Subject Index

A68 protein
  Alzheimer-related neuronal protein A68: specificity and distribution (Wolozin and Davies), 521
Abetalipoproteinemia
  confusing reporting in abetalipoproteinemia (Norcross et al), LETTER, 95
Acetazolamide
  acetazolamide-responsive familial paroxysmal ataxia with associated peripheral neuropathy (Hahn et al), 168A
Acetylcarnitine
  dose-dependent increase of cerebral 2 deoxyglucose uptake by systemically administered acetyl-S-carnitine (Fariello et al), 170A
Acetylcholinesterase
  cholinesterases within neurofibrillary tangles related to age and Alzheimer's disease (Mesulam and Morán), 223
Acidosis
  acidosis corresponds with excess glucose utilization in ischemic penumbra (Peek et al), 160A
  methylmalonic acid, methanol, metabolic acidosis, and lesions of the basal ganglia (Rosenberg), LETTER, 96; reply (Korf et al), LETTER, 96
Acquired immunodeficiency syndrome. *See* AIDS
Acrylamides
  delayed onset of distal axonal dysfunction in primates after prolonged low-level intoxication with acrylamide (Schaumburg et al), 130A
Adenosine
  A3 adenosine binding sites: possible endogenous anticonvulsant receptor in brain? (Chin and DeLorenzo), 171A
Adenosine triphosphate
  muscle energy metabolism in human phosphofructokinase deficiency as recorded by ^{31}P nuclear magnetic resonance spectroscopy (Argov et al), 46
Ad hoc reviewers
  ad hoc reviewers, NOTICE, 1
Adrenal medulla, transplantation
  neural transplants: are we ready? (Joynt and Gash), EDITORIAL, 455
  transplantation in Parkinson's disease: two cases of adrenal medullary grafts to the putamen (Lindvall et al), 457
Adrenergic fibers
  somatic and autonomic function in progressive autonomic failure and multiple system atrophy (Cohen et al), 692
Adrenoleukodystrophy
  adrenoleukodystrophy-adrenomyeloneuropathy carrier detection by magnetic resonance imaging (Snyder and Orrison), 444A
Adrenomyeloneuropathy
  adrenoleukodystrophy-adrenomyeloneuropathy carrier detection by magnetic resonance imaging (Snyder and Orrison), 444A
Affective disorders
  oculogyric crisis: a syndrome of thought disorder and ocular deviation (Leigh et al), 13
Aging
  magnetic resonance imaging analysis of normal aging: rust and water (Drayer et al), 122A
Agnosia
  in vivo magnetic resonance imaging-based volumetric brain analysis in subjects with verbal auditory agnosia (Filipek et al), 410A
  role of scanpaths in facial recognition and learning (Rizzo et al), 41
AIDS
  cerebral granulomatous angiitis causing multiple ischemic cerebrovascular accidents in a child with acquired immunodeficiency syndrome (Frank et al), 452A
  HIV antigen in brains of patients with AIDS (Gabuzda and Sobel), LETTER, 668
  intra-blood–brain barrier IgG synthesis and abnormal serum bands in patients with acquired immune deficiency syndrome, related complex, and asymptomatic HIV-positive compared to normal subjects (Tourtellotte et al), 155A
  metabolic pathology of the AIDS dementia complex (Rottenberg et al), 700
  oligoclonal immunoglobulin bands in acquired immune deficiency syndrome and related complex (Grimaldi et al), 138A
  relationship between primary central nervous system lymphoma and Epstein-Barr virus in acquired immune deficiency syndrome: in situ hybridization studies (Murray et al), 155A
  trophic effects of neuroleukin on central neurons and functional interactions with HIV envelope protein (Apatoff et al), 156A
Albumins
  efficiency of plasma exchange in Guillain-Barré syndrome: role of replacement fluids (French Cooperative Group on Plasma Exchange in Guillain-Barré Syndrome), 753
Alcohol, methyl
  methylmalonic acid, methanol, metabolic acidosis, and lesions of the basal ganglia (Rosenberg), LETTER, 96; reply (Korf et al), LETTER, 96
Alcohols
  calcium channel antagonists and alcohol withdrawal in cell culture (Greenberg et al), 171A
Aldose reductase
  aldose reductase inhibitor (Tolrestat) therapy in patients with diabetic peripheral neuropathy (Harati et al), 129A
Aluminum, toxicity
  aluminum toxicity in amyotrophic lateral sclerosis (Patten), 169A
Alzheimer's disease
  Alzheimer-related neuronal protein A68: specificity and distribution (Wolozin and Davies), 521
  Alzheimer's disease and other dementing illnesses in a defined United States population: incidence rates and clinical features (Schoenberg et al), 724
  Alzheimer's disease: glutamate depletion in the hippocampal perforant pathway zone (Hyman et al), 37
  aminergic systems in Alzheimer's disease and Parkinson's disease (D'Amato et al), 229
  anatomy of cholinesterase inhibition in Alzheimer's disease: effect of physostigmine and tetrahydroaminoacridine on plaques and tangles (Mesulam et al), 683
  axonal disruption and aberrant localization of tau protein characterize the neuropil pathology of Alzheimer's disease (Kowall and Kosik), 639

July issue, pp 1–174; August issue, pp 175–288; September issue, pp 289–454; October issue, pp 455–564; November issue, pp 565–672; December issue, pp 673–808.

Alzheimer's disease *(continued)*
basal forebrain–lesioned monkeys are severely impaired in tasks of association and recognition memory (Irle and Markowitsch), 735
cerebrospinal fluid monoamine metabolites and somatostatin in dominantly inherited Alzheimer's disease (Polinsky et al), 121A
cerebrospinal fluid neurotransmitter markers in the myoclonic subtype of dementia of the Alzheimer type (Kaye et al), 121A
cholinesterases within neurofibrillary tangles related to age and Alzheimer's disease (Mesulam and Morán), 223
corticotropin-releasing factor and somatostatin in Alzheimer's disease: comparative changes in postmortem cerebral cortex (Mazurek et al), 122A
effects of oral physostigmine in Alzheimer's disease (Stern et al), 306
intracortical distribution of glycolytic enzymes in Alzheimer's disease (Sorbi et al), 123A
loss of pedunculopontine neurons in progressive supranuclear palsy (Zweig et al), 18
mamillary body atrophy in Wernicke's encephalopathy: antemortem identification using magnetic resonance imaging (Charness and DeLaPaz), 595
marked loss of cerebral galactolipids in Pick's disease (Scicutella and Davies), 606
nature and origin of senile plaques in Alzheimer's disease, congophilic angiopathy, and normal old age (Narang), 122A
neuropsychological deficits in olivopontocerebellar atrophy: implications for the cholinergic hypothesis of Alzheimer's dementia (Kish et al), 121A
neuropsychological memory tests in the diagnosis of early Alzheimer's disease (Petersen et al), 123A
phenylethanolamine *N*-methyltransferase activity is decreased in Alzheimer's disease brains (Burke et al), 278
platelet membrane abnormality in Alzheimer's disease (Zubenko et al), 237
primary progressive aphasia—differentiation from Alzheimer's disease (Mesulam), EDITORIAL, 533
regional cerebral blood flow in Down's syndrome (Melamed et al), 275
regional cerebral blood flow mapping using ^{123}I-IMP single photon emission computed tomography, ^{133}xenon clearance, and neuropsychological testing in dementia of the Alzheimer type (Broich et al), 124A
somatostatin and cognitive dysfunction in Alzheimer's disease (Swihart et al), 122A
tau antisera recognize neurofibrillary tangles in a range of neurodegenerative disorders (Joachim et al), 514
validation of clinical diagnostic criteria in senile dementia of the Alzheimer type (Morris et al), 122A
Aminobutyric acids
functional anatomy of pentylenetetrazol and electroshock seizures in the rat brainstem (Miller et al), 615
Aminopyridines
physiological effects of 4-aminopyridine on demyelinated mammalian motor and sensory fibers (Bowe et al), 264
Amnesia
role of scanpaths in facial recognition and learning (Rizzo et al), 41
transient global amnesia: the electroencephalogram at onset (Cole et al), 771
Amygdaloid body
age-related shrinkage of cortically projecting cholinergic neurons: a selective effect (Mesulam et al), 31
Amyloid
experimental animal model of amyloid plaques using dense microspheres extracted from human brain (Averback), 120A
Amyloidosis
analysis of a variant prealbumin associated with type 1 familial amyloidotic polyneuropathy in Japan by high-pressure liquid chromatography (Ikegawa et al), 142A
intraocular transthyretin synthesis explains ocular involvement in familial amyloidotic polyneuropathy (Martone et al), 149A
treatment of orthostatic hypotension in familial amyloidotic polyneuropthy with L-threo-3,4-dihydroxyphenylserine (Araki et al), 171A
Amyotrophic lateral sclerosis
abnormal glutamate metabolism in amyotrophic lateral sclerosis (Plaitakis and Caroscio), 575
aluminum toxicity in amyotrophic lateral sclerosis (Patten), 169A
baroreceptor-mediated and thyrotropin-releasing hormone–mediated catecholamine secretion in amyotrophic lateral sclerosis patients with bulbar involvement (Brooks et al), 169A
cell surface molecules in amyotrophic lateral sclerosis (Kushner et al), 167A
central motor conduction in motor neuron disease (Hugon et al), 544
current status of thyrotropin-releasing hormone therapy in amyotrophic lateral sclerosis (Committee on Health Care Issues, American Neurological Association), HEALTH CARE ISSUES, 541
lowered cerebral glucose utilization in amyotrophic lateral sclerosis (Dalakas et al), 580
motor unit estimates in the biceps-brachialis in amyotrophic lateral sclerosis (Strong et al), 167A
parathyroid and vitamin D metabolism in amyotrophic lateral sclerosis (Glasberg et al), 127A
rating scale for amyotrophic lateral sclerosis: description and preliminary experience (Appel et al), 328
Aneurysm
alpha-glucosidase deficiency and basilar artery aneurysm: report of a sibship (Makos et al), 629
Aneurysm, mycotic
mycotic aneurysm, subarachnoid hemorrhage, and indications for cerebral angiography in infectious endocarditis (Salgado et al), 159A
Anosmia
X-linked ichthyosis due to steroid sulfatase deficiency associated with hypogonadism and anosmia (Andria et al), LETTER, 98; reply (Shapiro and Yen), LETTER, 99
Anoxia
effects of hypoxia on catecholamine metabolism in neonatal brain (Gordon et al), 435A
hypoxic relaxation of cerebral vessels: the role of the endothelium and cyclooxygenase inhibition (Ashwal and Pearce), 445A
Antibodies, monoclonal
acetylcholine receptors in human thymic myoid cells in situ: an immunohistological study (Schluep et al), 212
immunohistochemical identification and quantitation of mononuclear cells in facioscapulohumeral muscular dystrophy (Arahata et al), 165A
peripheral neuropathy associated with monoclonal IgM autoantibody (Steck et al), BRIEF REVIEW, 764
Antibodies, myoclonal
in vivo labeling of blood T cells: rapid traffic into cerebrospinal fluid in multiple sclerosis (Hafler and Weiner), 89

Anticonvulsants
binding profiles of anticonvulsants in neonates with seizures (Painter et al), 413A
effect of anticonvulsants on GABAergic activity in a neuronal cell clone (Singer and Searles), 433A
multiple brief nontemporal focal seizures in well children: a benign epileptic syndrome with apparent cure in some by a very short course of anticonvulsants (Camfield and Dooley), 414A
Antioxidants
electrophysiological assessment of antioxidant therapy in optic neuritis (Guy et al), 152A
Aphasia
metabolic investigation of a disconnection syndrome: conduction aphasia (Kempler et al), 134A
primary progressive aphasia—differentiation from Alzheimer's disease (Mesulam), EDITORIAL, 533
progressive aphasia without dementia: two cases with focal spongiform degeneration (Kirshner et al), 527
studies of cerebral metabolism and language dysfunction after acute ischemic aphasia (Kushner et al), 135A
Aphasia, Broca's
study of Broca's aphasia by ^{18}F-fluorodeoxyglucose positron emission tomography (Metter et al), 134A
Apolipoproteins
implications of apolipoprotein E as a marker of astroglial tumor cells in the human brain (Murakami et al), 162A
Arachidonic acids
arachidonic acid deficiency: clinical, electrophysiological, and pathological studies in infancy (Finkel et al), 443A
Arginine vasopressin
intracerebral injection of arginine vasopressin produces brain edema in the cat (Rosenberg et al), 150A
Arthritis
atlantoaxial subluxation in psoriatic arthropathy: clinical, magnetic resonance imaging, and radiographic features (Kaplan et al), 143A
Aspartate
acute and chronic administration of therapeutic doses of valproate reduces brain aspartate levels in developing mice: possible neurophysiological and clinical significance (Thurston and Hauhart), 438A
Asphyxia neonatorum
Beagle pup model of perinatal asphyxia: serial cerebral blood flow and ^{31}P NMR spectra analyses of cerebral metabolic rate (Ment et al), 427A
predictors of neurodevelopmental outcome at age 4 years following intrapartum asphyxia (Shankaran et al), 424A
prognostic importance of acute hyperglycemia following asphyxia in the term newborn (Roland et al), 422A
Asterixis. *See* Tremor
Astrocytes
effects of interferons on Ia gene expression in human astrocytic cells (Ransohoff et al), 151A
inhibition of astrocyte mitogenesis by heparin (Robertson and Goldstein), 151A
mechanism of prostaglandin release from astrocytes: studies on the effect of protein kinase C–activating phorbol ester phorbol myristate acetate (Hartung et al), 141A
progressive aphasia without dementia: two cases with focal spongiform degeneration (Kirshner et al), 527
sprouting and reactive astrocytes in senile plaque formation (Geddes et al), 131A
Astrocytoma
supratentorial malignant gliomas in childhood: a review of fifty cases (Dropcho et al), 355
Ataxia
acetazolamide-responsive familial paroxysmal ataxia with associated peripheral neuropathy (Hahn et al), 168A
ataxia after severe head injury: the pathological substrate (Chester and Reznick), 77
ataxia and paraproteinemic polyneuropathy (Kelly), LETTER, 94; reply (Dalakas), LETTER, 94
mitochondrial hydroxyapatite deposits in spinocerebellar degeneration (Munoz et al), 258
Athetosis
basal ganglion calcification in paroxysmal dystonic choreoathetosis (Yamamoto and Kawazawa), LETTER, 556; reply (Micheli et al), LETTER, 556
Atrial fibrillation
risk factors for ischemic stroke: a prospective study in Rochester, Minnesota (Davis et al), 319
Atrophy
muscle carnitine deficiency in neurogenic atrophy (Amit et al), 450A
Attention deficit disorder
electrophysiological indicators for attention deficit disorder—learning disability subgroups: cognitive and pharmacological evoked potentials studies (Frank et al), 440A
go–no-go paradigm in attention deficit disorder (Trommer et al), 410A
neurochemical influences of stimulants in children with attention deficit disorder: d-amphetamine versus methylphenidate effects on plasma and urinary monoamines and metabolites (Shaywitz et al), 409A
referral bias in attention deficit disorder: confounding effects of conduct disorder (Epstein et al), 441A
use of methylphenidate in children with seizures and attention deficit disorder (Crumrine et al), 441A
Autism
autism: evolution from a mixed transcortical aphasia to an aprosodia or dysprosodia (Minshew and Payton), 409A
interregional correlations of glucose utilization among brain regions in autistic adults (Horwitz et al), 118A
Autism, infantile
early appearance of partial complex seizures in children with infantile autism (Payton and Minshew), 408A
Autonomic nervous system diseases
somatic and autonomic function in progressive autonomic failure and multiple system atrophy (Cohen et al), 692
Axons
acute ischemia causes axonal stasis, swelling, attenuation, and secondary demyelination (Nukada and Dyck), 311
axonal disruption and aberrant localization of tau protein characterize the neuropil pathology of Alzheimer's disease (Kowall and Kosik), 639
Axoplasmic flow
electron microscopic and immunohistochemical evidence for impairment of axonal transport in Creutzfeldt-Jakob disease (Liberski et al), 157A
Azathioprine
no change in clinical course of patients with multiple sclerosis after stopping azathioprine treatment (Myers et al), 153A

Basal ganglia
experimental hemiplegia in the monkey: basal ganglia glucose activity during recovery (Gilman et al), 370
Basal ganglia diseases
basal ganglion calcification in paroxysmal dystonic choreoathetosis (Yamamoto and Kawazawa), LETTER, 556; reply (Micheli et al), LETTER, 556

Basal ganglia diseases *(continued)*
metabolism of the basal ganglia in hemiballismus (Dubinsky et al), 145A
methylmalonic acid, methanol, metabolic acidosis, and lesions of the basal ganglia (Rosenberg), LETTER, 96; reply (Korf et al), LETTER, 96
Basal nucleus of Meynert. *See* Substantia innominata
Basilar artery
alpha-glucosidase deficiency and basilar artery aneurysm: report of a sibship (Makos et al), 629
reversed basilar artery flow detected by transcranial Doppler ultrasound in the subclavian steal syndrome (Tatemichi et al), 136A
Behavioral disorders
neurological syndrome following bilateral damage to the head of the caudate nuclei (Richfield et al), 768
Benzodiazepines
benzodiazepine receptor function on human T-cell clones (Richert et al), 138A
Blepharospasm
excitability of blink reflexes in patients with blepharospasm after successful treatment with botulinium toxin (Cohen et al), 172A
Blood–brain barrier
effect of hyperosmotic blood–brain barrier disruption on blood-to-tissue transport in ENU-induced gliomas (Warnke et al), 300
intra-blood–brain barrier IgG synthesis and abnormal serum bands in patients with acquired immune deficiency syndrome, related complex, and asymptomatic HIV-positive compared to normal subjects (Tourtellotte et al), 155A
in vivo labeling of blood T cells: rapid traffic into cerebrospinal fluid in multiple sclerosis (Hafler and Weiner), 89
is there a therapeutic role for osmotic breaching of the blood–brain barrier? (Fishman), EDITORIAL, 298
neurotransmitters modulate Ca^{2+} influx and transport processes in brain capillaries: a new model for blood–brain barrier regulation (Koenig et al), 137A
Blood flow velocity
decrease of cerebral blood flow velocities by indomethacin (Bejar et al), 424A
normal values for cerebral blood flow velocities in the internal carotid artery of preterm and term infants (Bejar et al), 430A
postnatal changes in cerebral blood flow velocity in healthy premature infants suggest development of autoregulation (Perlman et al), 428A
Blood platelets
platelet membrane abnormality in Alzheimer's disease (Zubenko et al), 237
Blood pressure
blood pressure changes after cerebral infarction: implications for therapeutic trials (Grotta et al), 160A
Books
Hand Function and the Neocortex, Experimental Brain Research, Supplementum 10, edited by Goodwin and Darian-Smith (LeDoux), 560
Left Side—Right Side: A Review of Laterality Research, by Beaton (LeDoux), 560
Two Hemispheres—One Brain: Functions of the Corpus Callosum (Vol 17, Neurology and Neurobiology), edited by Lepore et al (LeDoux), 670
Borrelia infections
chronic muscle weakness caused by *Borrelia burgdorferi* meningoradiculitis (Wokke et al), 389
Botulinum toxins
botulinum toxin in writer's cramp: a pilot study (Tsui et al), 147A
excitability of blink reflexes in patients with blepharospasm after successful treatment with botulinium toxin (Cohen et al), 172A
Brachial plexus
electrophysiological evaluation of brachial plexopathy: clinical relevance (Aminoff et al), 165A
Brain, abnormalities
cavitary white matter necrosis: early neurodevelopmental outcome (Vaucher et al), 436A
in vivo magnetic resonance imaging-based volumetric brain analysis in subjects with verbal auditory agnosia (Filipek et al), 410A
Brain, embryology
neurofilament protein synthesis in the developing nervous system (Noetzel), 433A
Brain, growth and development
expression of specific fetal mouse brain mRNAs may be regulated by thyroid hormone (Stein), 447A
magnetic resonance imaging analysis of normal aging: rust and water (Drayer et al), 122A
normal brain growth and maturation in Down's syndrome fetuses aged 15 to 22 weeks (Wisniewski et al), 430A
positron emission tomography study of human brain functional development (Chugani et al), 487
Brain, metabolism
concept of coupling blood flow to brain function: revision required? (Lou et al), NEUROLOGICAL PROGRESS, 289
in vivo ^{31}P and in vitro ^{1}H nuclear magnetic resonance study of brain metabolism during neonatal hypoglycemia (Young et al), 429A
mapping of metabolic responses of brain to mind-altering drugs (Porrino and Kennedy), 421A
metabolic maturation of the brain: a study of local cerebral glucose utilization in the cat (Chugani et al), 439A
Brain asymmetry
association of specific patterns of cerebral asymmetry with neuropsychological deficits (Voeller), 409A
Brain chemistry
variability of cerebral glucose extraction fraction in the resting state (Tramo et al), 161A
Brain death
xenon computed tomography cerebral blood flow determinations in clinically brain dead children (Ashwal et al), 451A
Brain diseases
adult-onset spinocerebellar syndrome with idiopathic vitamin E deficiency (Yokota et al), 84
cerebral atrophy in diabetes mellitus (Ho et al), 124A
comparison between neonatal EEG patterns and neuropathological findings (Aso et al), 418A
marked loss of cerebral galactolipids in Pick's disease (Scicutella and Davies), 606
molecular pathogenesis of neurotropic viral infections (Gonzalez-Scarano and Tyler), NEUROLOGICAL PROGRESS, 565
neurological disease associated with anticardiolipin antibodies (Briley et al), 136A
Brain edema
intracerebral injection of arginine vasopressin produces brain edema in the cat (Rosenberg et al), 150A
Brain injuries
ataxia after severe head injury: the pathological substrate (Chester and Reznick), 77
cerebral injury and regional cerebral blood flow in new-

born infants undergoing extracorporeal membrane oxygenation (Perlman et al), 421A
computed tomographic scans, Glasgow Coma Scale, and outcome in childhood head trauma (Scheller et al), 432A
site of penetrating brain lesions causing chronic acquired stuttering (Ludlow et al), 60
Brain neoplasms
atypical teratoid tumor of infancy: definition of an entity (Lefkowitz et al), 448A
chemotherapy for recurrent malignant oligodendroglioma (Macdonald and Cairncross), 162A
continuous infusion vincristine and adriamycin in the treatment of recurrent childhood brain tumors (Walker et al), 448A
effect of hyperosmotic blood–brain barrier disruption on blood-to-tissue transport in ENU-induced gliomas (Warnke et al), 300
implications of apolipoprotein E as a marker of astroglial tumor cells in the human brain (Murakami et al), 162A
intellectual sequelae of whole brain radiotherapy for children with brain tumors (Packer et al), 408A
nitrogen mustard vincristine procarbazine and prednisone (MOPP) in treatment of recurrent brain tumors of childhood (Baram et al), 450A
phenobarbital rheumatism in primary brain tumor patients (Taylor et al), 117A
pineal tumors cause precocious pseudopuberty, not true precocious puberty (Fetell et al), 448A
primary central nervous system lymphoma: unusual but characteristic clinical presentations (O'Neill et al), 162A
structural and numerical karyotypic abnormalities in childhood brain neuroectodermal tumors (Packer et al), 449A
supratentorial malignant gliomas in childhood: a review of fifty cases (Dropcho et al), 355
unilateral asterixis due to ipsilateral lesions in the pons and medulla (Peterson and Peterson), 661
Brain stem
effects of hypothermia on brainstem auditory evoked potentials in humans (Markand et al), 507
functional anatomy of pentylenetetrazol and electroshock seizures in the rat brainstem (Miller et al), 615
loss of pedunculopontine neurons in progressive supranuclear palsy (Zweig et al), 18
multifocal CNS demyelination following peripheral inoculation with herpes simplex virus type 1 (Kastrukoff et al), 52
Brief book reviews, 100, 286–288, 560–562, 670–671
Bronchopulmonary dysplasia
movement disorder in premature infants with severe bronchopulmonary dysplasia: a new syndrome (Perlman et al), 427A
Butyrylcholinesterase
cholinesterases within neurofibrillary tangles related to age and Alzheimer's disease (Mesulam and Morán), 223

C-reactive protein
three acute phase reactant proteins in the diagnosis of bacterial meningitis (Larsen and DeLallo), 454A
Calcification
basal ganglion calcification in paroxysmal dystonic choreoathetosis (Yamamoto and Kawazawa), LETTER, 556; reply (Micheli et al), LETTER, 556
Calcium
mitochondrial hydroxyapatite deposits in spinocerebellar degeneration (Munoz et al), 258
Calcium channel blockers
calcium channel antagonists and alcohol withdrawal in cell culture (Greenberg et al), 171A
Calcium deficiency
possible role of low dietary calcium in the evolution of motor neuron disease: a primate model (Shankar et al), 119A
Canada
multiple sclerosis in Canada (Sadovnick and Sweeney), LETTER, 667; reply (Pryse-Phillips), LETTER, 667
Carbamazepine
carbamazepine and cardiac conduction disturbances (Benassi et al), 280
comparative effects of carbamazepine, phenytoin, and phenobarbital on cognition and behavior in epileptic children (Pellock et al), 421A
correlation of a noninstrumented enzyme immunochromatographic assay for carbamazepine with fluorescence polarization (Denio et al), 130A
effect of carbamazepine on valproic acid and its unsaturated metabolites (Farrell et al), 418A
Carbamazepine, toxicity
carbamazepine toxicity with therapeutic total levels and elevated free levels (Rothner et al), 413A
Carbidopa
comparison of controlled-release Sinemet 50/200 mg with standard Sinemet 25/100 mg in Parkinson's disease (Lieberman et al), 173A
pharmacokinetic study of controlled release levodopa/carbidopa (CR4-Sinemet) versus traditional Sinemet (Goetz et al), 170A
results of long-term treatment with controlled release levodopa/carbidopa (Cedarbaum et al), 145A
Cardiolipins
neurological disease associated with anticardiolipin antibodies (Briley et al), 136A
Carnitine
muscle carnitine deficiency in neurogenic atrophy (Amit et al), 450A
Carotid arteries
absence of carotid artery disease in patients with anterior choroidal artery territory infarction (Bruno et al), 160A
does carotid endarterectomy decrease stroke and death in patients with transient ischemic attacks? (Committee on Health Care Issues, American Neurological Association), HEALTH CARE ISSUES, 72
intraoperative monitoring during carotid endarterectomy (Wilkins), LETTER, 283; reply (Cho et al), LETTER, 284
value of intraoperative monitoring during carotid endarterectomy: a comment (Davenport), LETTER, 283
Carotid artery diseases
borderzone ischemia (Leblanc et al), 707
Carotid artery thrombosis
new model of embolic stroke in the rat from a photochemical nonocclusive carotid lesion (Futrell et al), 158A
Castration
castration reduces the rate of denervation atrophy of skeletal muscle fibers in rat solei and plantares (Karpati et al), 169A
Catecholamines
baroreceptor-mediated and thyrotropin-releasing hormone–mediated catecholamine secretion in amyotrophic lateral sclerosis patients with bulbar involvement (Brooks et al), 169A
increased cerebrospinal fluid levels of catecholamines following complex partial and generalized tonic-clonic seizures (Devinsky et al), 131A

Catecholamines, metabolism
effects of hypoxia on catecholamine metabolism in neonatal brain (Gordon et al), 435A
Cations
brain cation pump inhibited by "normal" lead levels (Bertoni and Sprenkle), 143A
Caudate nucleus
Huntington's disease: changes in tachykinin content in postmortem brains (Arai et al), 587
neurological syndrome following bilateral damage to the head of the caudate nuclei (Richfield et al), 768
Cell adhesion
glial mediation of neural microvessel endothelial cell adhesion (Laterra and Goldstein), 150A
Central nervous system disease, congenital
neonatal metabolic disorders masquerading as structural central nervous system anomalies (Weinstein and Novotny), 406A
Cerebellar cortex
immunofluorescent labeling of Purkinje and other cerebellar cell types with antibody eluted from a malignant ovarian neoplasm (Greenlee and Brashear), 163A
Cerebellum
brain choline acetyltransferase reduction in dominantly inherited olivopontocerebellar atrophy (Kish et al), 272
Cerebral cortex
age-related shrinkage of cortically projecting cholinergic neurons: a selective effect (Mesulam et al), 31
anatomy of cholinesterase inhibition in Alzheimer's disease: effect of physostigmine and tetrahydroaminoacridine on plaques and tangles (Mesulam et al), 683
axonal disruption and aberrant localization of tau protein characterize the neuropil pathology of Alzheimer's disease (Kowall and Kosik), 639
borderzone ischemia (Leblanc et al), 707
differences in cerebral blood flow and glucose utilization in vegetative versus locked-in patients (Levy et al), 673
experimental hemiplegia in the monkey: basal ganglia glucose activity during recovery (Gilman et al), 370
lowered cerebral glucose utilization in amyotrophic lateral sclerosis (Dalakas et al), 580
metabolic pathology of the AIDS dementia complex (Rottenberg et al), 700
positron emission tomography studies of cerebral glucose metabolism in chronic partial epilepsy (Abou-Khalil et al), 480
positron emission tomography study of human brain functional development (Chugani et al), 487
predicting outcome after cortical resection surgery (Somerville), LETTER, 667; reply (Dodrill), LETTER, 668; Editor's note (Asbury), LETTER, 668
primary progressive aphasia—differentiation from Alzheimer's disease (Mesulam), EDITORIAL, 533
progressive aphasia without dementia: two cases with focal spongiform degeneration (Kirshner et al), 527
Cerebral hemorrhage
longitudinal neurodevelopmental study of infants with large posthemorrhagic ventriculomegaly and periventricular leukomalacia (Torres et al), 426A
natural history and outcome following intraventricular hemorrhage in the premature infant (Ahmann et al), 420A
prophylactic indomethacin for prevention of intraventricular hemorrhage: neurodevelopmental follow-up (Bandstra et al), 427A
randomized low-dose indomethacin trial for the prevention of intraventricular hemorrhage in very-low-birthweight neonates (Ment et al), 406A
somatosensory evoked potentials and neurological follow-up in premature infants with periventricular hemorrhage (Willis et al), 429A
venous infarction: a major cause of intraventricular hemorrhage in the term newborn (Roland et al), 436A
ventriculosubcutaneous shunt for hydrocephalus after intraventricular hemorrhage (Zmora et al), 423A
Cerebral infarction
absence of carotid artery disease in patients with anterior choroidal artery territory infarction (Bruno et al), 160A
antenatal periventricular white matter infarction (Roland et al), 423A
blood pressure changes after cerebral infarction: implications for therapeutic trials (Grotta et al), 160A
dose escalation study of Org 10172 (low-molecular-weight) heparinoid in the treatment of acute cerebral infarction (Biller et al), 159A
protein S deficiency and intracranial vascular occlusion (Sacco et al), 115A
syndromes of the paramedian thalamopeduncular arteries: clinical and magnetic resonance imaging correlations in infarctions of the upper midbrain and thalamus (Tatemichi et al), 159A
Cerebral ischemia
acidosis corresponds with excess glucose utilization in ischemic penumbra (Peek et al), 160A
Beagle pup model of perinatal asphyxia: serial cerebral blood flow and ^{31}P NMR spectra analyses of cerebral metabolic rate (Ment et al), 427A
borderzone ischemia (Leblanc et al), 707
brain intracellular pH "flip-flop" in human ischemic stroke identified by ^{31}P nuclear magnetic resonance imaging (Levine et al), 137A
cerebral blood flow in acute cerebral insult: a follow-up study (Hartmann et al), 137A
glutamate antagonist MK-801 attenuates perinatal hypoxic-ischemic brain injury (McDonald et al), 407A
kynurenate inhibition of cell excitation decreases stroke size and deficits (Germano et al), 730
lupus inhibitor and brain ischemia (Kushner et al), 115A
naloxone nonstereospecifically attenuates hypoxic cortical neuronal injury in vitro (Goldberg et al), 116A
platelet-activating-factor–induced platelet aggregation is unaltered by cycloxygenase inhibition in acute human cerebral ischemia (Joseph et al), 136A
platelet activation in patients with cerebral ischemia (Fisher), 115A
quantitative cerebral blood flow and neurological outcome in newborn infants (Altman et al), 426A
regional brain glycogen metabolism during global ischemia (Swanson et al), 136A
risk factors for ischemic stroke: a prospective study in Rochester, Minnesota (Davis et al), 319
selective sparing of NADPH-diaphorase–reactive neurons in neonatal hypoxic-ischemic injury (Ferriero et al), 135A
studies of cerebral metabolism and language dysfunction after acute ischemic aphasia (Kushner et al), 135A
substantia nigra lesion protects against ischemic striatal injury: morphological evidence (Globus et al), 116A
Cerebral ischemia, transient
does carotid endarterectomy decrease stroke and death in patients with transient ischemic attacks? (Committee on Health Care Issues, American Neurological Association), HEALTH CARE ISSUES, 72
risk factors for ischemic stroke: a prospective study in Rochester, Minnesota (Davis et al), 319

Cerebral palsy
dumping syndrome following Nissen fundoplication in children with severe mental retardation and quadriparetic cerebral palsy (Wyllie et al), 453A
Cerebrospinal fluid
Alzheimer-related neuronal protein A68: specificity and distribution (Wolozin and Davies), 521
cerebrospinal fluid lactate and pyruvate in childhood neurological illnesses (Rust et al), 443A
determination by high-performance liquid chromatography of cerebrospinal fluid gangliosides in GM_1 and GM_2 gangliosidoses (Kaye et al), 444A
in vivo labeling of blood T cells: rapid traffic into cerebrospinal fluid in multiple sclerosis (Hafler and Weiner), 89
mechanism of increased cerebrospinal fluid transthyretin in the neonate is different from that in diseases in which there is increased blood–cerebrospinal fluid barrier permeability (Larsen and DeLallo), 428A
successful treatment of spontaneous low cerebrospinal fluid pressure headache (Petersen et al), 148A
Cerebrospinal fluid shunts
reversibility of metabolic and cognitive deficits in normal pressure hydrocephalus following shunt surgery (Kaye et al), 124A
Cerebrovascular circulation
brain intracellular pH "flip-flop" in human ischemic stroke identified by ^{31}P nuclear magnetic resonance imaging (Levine et al), 137A
cerebral blood flow in acute cerebral insult: a follow-up study (Hartmann et al), 137A
cerebral blood flow in normal subjects of varying age and in patients with risk factors for cerebrovascular disease (Hartmann et al), 161A
cerebral vascular reactivity in migraineurs as measured by transcranial Doppler ultrasound (Thomas and Harpold), 148A
cognitive performance and cerebral blood flow fluctuate in multiinfarct dementia (Meyer et al), 136A
concept of coupling blood flow to brain function: revision required? (Lou et al), NEUROLOGICAL PROGRESS, 289
coupled increases of local cerebral glucose utilization and blood flow are elicited by a somatosensory task in normal humans (Ginsberg et al), 158A
differences in cerebral blood flow and glucose utilization in vegetative versus locked-in patients (Levy et al), 673
hypoxic relaxation of cerebral vessels: the role of the endothelium and cyclooxygenase inhibition (Ashwal and Pearce), 445A
improved methods for mapping local cerebral blood flow by 27% to 30% xenon-enhanced computed tomography (Meyer et al), 158A
normal values for cerebral blood flow velocities in the internal carotid artery of preterm and term infants (Bejar et al), 430A
postnatal changes in cerebral blood flow velocity in healthy premature infants suggest development of autoregulation (Perlman et al), 428A
regional cerebral blood flow and glucose metabolism during perinatal hypoglycemia (Mujsce et al), 429A
regional cerebral blood flow in Down's syndrome (Melamed et al), 275
regional cerebral blood flow mapping using ^{123}I-IMP single photon emission computed tomography, ^{133}xenon clearance, and neuropsychological testing in dementia of the Alzheimer type (Broich et al), 124A
reversed basilar artery flow detected by transcranial Doppler ultrasound in the subclavian steal syndrome (Tatemichi et al), 136A
xenon computed tomography cerebral blood flow determinations in clinically brain dead children (Ashwal et al), 451A
Cerebrovascular disorders
cerebral blood flow in normal subjects of varying age and in patients with risk factors for cerebrovascular disease (Hartmann et al), 161A
Charcot-Marie disease
alterations in phospholipid and fatty acid contents of Charcot-Marie-Tooth erythrocyte membranes (Williams et al), 164A
Choline acetyltransferase
brain choline acetyltransferase reduction in dominantly inherited olivopontocerebellar atrophy (Kish et al), 272
cholinergic-dependent cognitive deficits in Parkinson's disease (Dubois et al), 26
Cholinergic fibers
age-related shrinkage of cortically projecting cholinergic neurons: a selective effect (Mesulam et al), 31
cholinergic-dependent cognitive deficits in Parkinson's disease (Dubois et al), 26
cognitive evoked potentials: cholinergic modulation of spectral power (Meador et al), 123A
loss of pedunculopontine neurons in progressive supranuclear palsy (Zweig et al), 18
Cholinesterase inhibitors
anatomy of cholinesterase inhibition in Alzheimer's disease: effect of physostigmine and tetrahydroaminoacridine on plaques and tangles (Mesulam et al), 683
Chondrodysplasia punctata
rhizomelic chondrodysplasia punctata: a peroxisomal disorder with defective plasmalogen synthesis (Naidu et al), 439A
Chorea
basal ganglion calcification in paroxysmal dystonic choreoathetosis (Yamamoto and Kawazawa), LETTER, 556; reply (Micheli et al), LETTER, 556
Chromatography, high pressure liquid
analysis of a variant prealbumin associated with type 1 familial amyloidotic polyneuropathy in Japan by high-pressure liquid chromatography (Ikegawa et al), 142A
Chromosome deletion
are deletion mutations etiological in the majority of Duchenne dystrophy patients? (Bartlett et al), 119A
Ciladopa
more on ciladopa (Snider), LETTER, 558; reply (Aminoff and Goodin), LETTER, 558
Cisplatin
acute and delayed neurotoxicity after infraophthalmic intracarotid BCNU and/or cisplatin for malignant glial tumors (Rogers et al), 162A
prospective nerve conduction studies in cisplatin therapy (Riggs et al), 166A
Clobazam
clobazam for refractory childhood seizure disorders: a valuable add-on drug (Camfield et al), 416A
Clone cells
characterization of a cDNA clone encoding myelin P_2 protein (Narayanan et al), 446A
cloning of myogenic cells of Duchenne muscular dystrophy by the transfection of origin-defective simian virus DNA (Nakamigawa et al), 447A
Clonidine
clonidine in Gilles de la Tourette's syndrome (Roos et al), LETTER, 773; reply (Goetz et al), LETTER, 774
Cloning, molecular
molecular cloning of a cDNA encoding rabbit myelin P_2 protein (Narayanan et al), 150A

Clorazepate dipotassium
clinical evaluation of clorazepate (Guggenheim et al), 412A
Cocaine
cocaine and methamphetamine exposure in neonates: perinatal consequences (Oro and Dixon), 428A
Cognition disorders
cognitive performance and cerebral blood flow fluctuate in multiinfarct dementia (Meyer et al), 136A
Collagen
collagen-omentum repair after experimental spinal cord transection (de la Torre and Goldsmith), 141A
Coma
bilateral absence of cortical somatosensory evoked potentials has a different importance in traumatic versus anoxic coma (DeLecluse et al), 142A
differences in cerebral blood flow and glucose utilization in vegetative versus locked-in patients (Levy et al), 673
Communicative disorders
prosodic deficits in children with left and right hemisphere lesions (Friedland et al), 408A
Connective tissue diseases
features of connective tissue disease in unselected multiple sclerosis patients (Aisen et al), 151A
Contact lenses
still another cause of monocular oscillopsia (Rosenberg), LETTER, 97
Convulsions
hippocampal neuron loss in temporal lobe epilepsy: correlation with early childhood convulsions (Sagar and Oxbury), 334
Coronary disease
risk factors for ischemic stroke: a prospective study in Rochester, Minnesota (Davis et al), 319
Corpus callosum
peripheral neuropathy with agenesis of the corpus callosum: a unique clinicopathological entity (Carpenter et al), 125A
Corpus striatum
elevated serotonin and reduced dopamine in subregionally divided Huntington's disease striatum (Kish et al), 386
Corticotropin
effect of corticotropin treatment on striatal dopamine D-2 receptors in developing rat brain (Chiriboga et al), 433A
serotonin hypothesis in infantile spasms: regional studies of corticotropin effects in vitro and in vivo on serotonin receptors in the neonatal and adult rat central nervous system (Pranzatelli), 437A
Corticotropin-releasing factor
corticotropin-releasing factor and somatostatin in Alzheimer's disease: comparative changes in postmortem cerebral cortex (Mazurek et al), 122A
Cortisol
cortisol induction by poly ICLC: implications for clinical trials of interferon in multiple sclerosis (Bever et al), 141A
Coxsackie B viruses
detection of Coxsackie B virus–specific RNA sequences in skeletal muscle biopsies of patients with the postviral fatigue syndrome (Bowles et al), 126A
Cranial nerves
mononeuritis multiplex in Waldenström's macroglobulinemia (Lamarca et al), 268
Creatine kinase
reduced accumulation of creatine kinase-MM in muscle fibers cultured in monolayer and innervated long-term from Duchenne muscular dystrophy patients (Askanas et al), 129A
Creutzfeldt-Jakob syndrome. See Jakob-Creutzfeldt syndrome
Crying
pathological crying: a pontine pseudobulbar syndrome (Tatemichi et al), 133A
pathological crying localization (Yarnell), 133A
Cyclosporins
immune regulation in multiple sclerosis patients treated with cyclosporine (Kerman et al), 154A
mechanism of cyclosporine-associated central nervous system effects in the rat (Famiglio et al), 454
pilot study to assess the safety and efficacy of cyclosporine A in the treatment of chronic inflammatory demyelinating polyneuropathy (Tindall et al), 168A
Cystinosis
neurological and cognitive deficits in cystinosis (Trauner et al), 441A
Cytochrome *b*
partial cytochrome *b* deficiency in a patient with spontaneous dystonia musculorum deformans (Nigro et al), 446A
Cytochrome oxidase
autopsy case of myoclonic epilepsy and ragged-red fibers with cytochrome *c* oxidase deficiency: evidence for a maternally inherited biochemical defect (Mendell et al), 128A
cytochrome *c* oxidase deficiency in Leigh syndrome (DiMauro et al), 498
Leigh's syndrome and cytochrome *c* oxidase deficiency (DeVivo et al), 445A
Cytomegalic inclusion disease
clinical spectrum of inclusion body myopathy (Baysal et al), 164A
Cytoplasmic filaments
in vitro self-assembly of neurofilament and tau proteins (Troncoso et al), 124A
neurofilament protein synthesis in the developing nervous system (Noetzel), 433A
Cytotoxins
new class of suicide transport agent: monoclonal anti-Thy 1 antibody coupled to the ribosome inhibiting proteir saporin (Wiley et al), 149A

Decarboxylase inhibitors
factors that influence the occurrence of response variations in Parkinson's disease (de Jong et al), 4
Dementia
Alzheimer's disease and other dementing illnesses in a defined United States population: incidence rates and clinical features (Schoenberg et al), 724
coexisting dementia and depression in Parkinson's disease: "double trouble" (Mayeux et al), 134A
immunocytochemical characterization of neurofibrillary tangles in amyotrophic lateral sclerosis and parkinsonism-dementia of Guam (Yanagihara et al), 120A
metabolic pathology of the AIDS dementia complex (Rottenberg et al), 700
regional cerebral blood flow in Down's syndrome (Melamed et al), 275
Dementia, presenile
marked loss of cerebral galactolipids in Pick's disease (Scicutella and Davies), 606
tau antisera recognize neurofibrillary tangles in a range of neurodegenerative disorders (Joachim et al), 514

Dementia, senile
validation of clinical diagnostic criteria in senile dementia of the Alzheimer type (Morris et al), 122A
Demyelinating diseases
acute ischemia causes axonal stasis, swelling, attenuation, and secondary demyelination (Nukada and Dyck), 311
cerebrospinal fluid and peripheral blood mononuclear cell typing in inflammatory demyelinating polyneuropathy (Cornblath et al), 117A
demyelinating motor neuropathy in patients with diabetic polyneuropathy (Cornblath et al), 126A
hereditary sensory and autonomic neuropathy characterized by hypertrophic neuropathy, gastrointestinal dysautonomia, nerve deafness and ophthalmoplegia: a new type? (Oh et al), 168A
immunohistochemical detection of C3d on myelin sheaths in neuropathy associated with anti-meylin-associated glycoprotein M-protein and in inflammatory demyelinating neuropathies (Hays et al), 128A
magnetic resonance imaging of experimental demyelinating lesions (Ford et al), 151A
movement disorders as sequelae of central pontine and extrapontine myelinolysis: report of three survivors (Maraganore et al), 146A
multifocal CNS demyelination following peripheral inoculation with herpes simplex virus type 1 (Kastrukoff et al), 52
parainflammatory demyelinating leukoencephalopathy of childhood: clinical and magnetic resonance imaging findings (Marks et al), 432A
physiological effects of 4-aminopyridine on demyelinated mammalian motor and sensory fibers (Bowe et al), 264
pilot study to assess the safety and efficacy of cyclosporine A in the treatment of chronic inflammatory demyelinating polyneuropathy (Tindall et al), 168A
search for antibodies to galactocerebroside in the serum and cerebrospinal fluid in human demyelinating disorders (Rostami et al), 381
successful treatment of encephalomyocarditis virus–induced demyelination with anti-LyT2 and anti-L3T4 antibodies (Sriram et al), 156A
Dendrites
dendritic development in an in vitro model: electron microscopic studies (Johnson and Higgins), 437A
Deoxyglucose
dose-dependent increase of cerebral 2 deoxyglucose uptake by systemically administered acetyl-S-carnitine (Fariello et al), 170A
Deprenyl
deprenyl for the "on-off" effect complicating Parkinson's disease: multicenter double-blind study (Golbe et al), 144A
Depression
coexisting dementia and depression in Parkinson's disease: "double trouble" (Mayeux et al), 134A
Dextroamphetamine
neurochemical influences of stimulants in children with attention deficit disorder: d-amphetamine versus methylphenidate effects on plasma and urinary monoamines and metabolites (Shaywitz et al), 409A
Diabetes mellitus
cerebral atrophy in diabetes mellitus (Ho et al), 124A
risk factors for ischemic stroke: a prospective study in Rochester, Minnesota (Davis et al), 319
Diabetes mellitus, insulin-dependent
neurological complications of diabetic ketoacidosis independent of increased intracranial pressure (Crawford et al), 453A
Diabetic neuropathies
aldose reductase inhibitor (Tolrestat) therapy in patients with diabetic peripheral neuropathy (Harati et al), 129A
demyelinating motor neuropathy in patients with diabetic polyneuropathy (Cornblath et al), 126A
effect of glucose control on reinnervation in diabetes (Shields and Norris), 126A
Dialysis
intracerebral dialysis in 1-methyl-4-phenyl-1,2,3,6-tetrahydropyridine parkinsonian primates (Alexander et al), 144A
Diazepam
lorazepam versus diazepam in status epilepticus in children (Giang and McBride), 415A
^{31}P and ^{1}H nuclear magnetic resonance study of the effect of diazepam on neonatal seizure (Young et al), 420A
successful use of rectal diazepam at home to prevent status epilepticus in selected children with convulsive disorders (Camfield et al), 417A
Diencephalon
hemi-see-saw nystagmus due to unilateral diencephalic lesion: a novel eye movement disorder (Halmagyi et al), 147A
DNA
characterization of a cDNA clone encoding myelin P_2 protein (Narayanan et al), 446A
cloning of myogenic cells of Duchenne muscular dystrophy by the transfection of origin-defective simian virus DNA (Nakamigawa et al), 447A
construction of an infectious cDNA clone of a demyelinating strain of Theiler's murine encephalomyelitis virus (Calenoff et al), 155A
DNA deletion in a Pakistani family with Duchenne muscular dystrophy (Siddique et al), 127A
DNA linkage studies in tuberous sclerosis (Kandt et al), 422A
highly variable region of DNA length polymorphism located adjacent to the human myelin basic protein gene (Boylan et al), 139A
isolation of cDNA clone coding for possible autoimmune target proteins in paraneoplastic subacute sensory neuropathy (Dropcho), 163A
molecular cloning of a cDNA encoding rabbit myelin P_2 protein (Narayanan et al), 150A
Dopa
multi-center study of Parkinson mortality with early versus late dopa treatment (Diamond et al), 8
Dopamine
elevated serotonin and reduced dopamine in subregionally divided Huntington's disease striatum (Kish et al), 386
intracerebroventricular infusion of <(+)-4-propyl-9-hydroxynaphthoxacine reverses behavioral effects of dopamine deficiency in rats (de Yebenes et al), 145A
MPTP-induced changes in dopamine systems in the primate mesolimbic system (Deutch et al), 172A
on-off phenomenon: relation to levodopa pharmacokinetics and pharmacodynamics (Nutt), BRIEF REVIEW, 535
Down's syndrome
cervical spine disorders in an institutionalized population with Down's syndrome (Clancy et al), 452A
normal brain growth and maturation in Down's syndrome fetuses aged 15 to 22 weeks (Wisniewski et al), 430A
regional cerebral blood flow in Down's syndrome (Melamed et al), 275

Down's syndrome *(continued)*
serial quantitative computed tomography analysis of brain morphometry in adult Down's syndrome at different ages (Schapiro et al), 432A
tau antisera recognize neurofibrillary tangles in a range of neurodegenerative disorders (Joachim et al), 514
Doxorubicin
continuous infusion vincristine and adriamycin in the treatment of recurrent childhood brain tumors (Walker et al), 448A
Drug administration
effect of hyperosmotic blood–brain barrier disruption on blood-to-tissue transport in ENU-induced gliomas (Warnke et al), 300
is there a therapeutic role for osmotic breaching of the blood–brain barrier? (Fishman), EDITORIAL, 298
Dumping syndrome
dumping syndrome following Nissen fundoplication in children with severe mental retardation and quadriparetic cerebral palsy (Wyllie et al), 453A
Dystonia musculorum deformans
partial cytochrome *b* deficiency in a patient with spontaneous dystonia musculorum deformans (Nigro et al), 446A

Electrocorticography
localization of magnetic interictal discharges in temporal lobe epilepsy (Rose et al), 348
Electrodes, implanted
subdural electrode recording in the preoperative evaluation of partial seizures in children (Resnick et al), 415A
Electroencephalography
clinical relevance of ambulatory electroencephalographic recording in 95 epileptic and nonepileptic children (Aminoff et al), 130A
comparison between neonatal EEG patterns and neuropathological findings (Aso et al), 418A
intraoperative monitoring during carotid endarterectomy (Wilkins), LETTER, 283; reply (Cho et al), LETTER, 284
localization of magnetic interictal discharges in temporal lobe epilepsy (Rose et al), 348
transient global amnesia: the electroencephalogram at onset (Cole et al), 771
value of intraoperative monitoring during carotid endarterectomy: a comment (Davenport), LETTER, 283
Electroshock
functional anatomy of pentylenetetrazol and electroshock seizures in the rat brainstem (Miller et al), 615
Emotions
lesion location and the deficit of emotional expression and comprehension (Kertesz and Cancelliere), 134A
Encephalitis
soluble IL-2 receptors in acute and subacute encephalitis (Boutin et al), 658
Encephalitogenic basic proteins
myelin-associated glycoprotein in multiple sclerosis lesions: a quantitative and qualitative analysis (Möller et al), 469
Encephalitogenic basic proteins, urine
myelin basic protein fragments in urine (Norton), EDITORIAL, 656
presence of immunoreactive myelin basic protein peptide in urine of persons with multiple sclerosis (Whitaker), 648
Encephalomyelitis, allergic
experimental allergic encephalomyelitis suppression with retinoic acid (Massacesi et al), 153A
Encephalomyocarditis virus
successful treatment of encephalomyocarditis virus–induced demyelination with anti-LyT2 and anti-L3T4 antibodies (Sriram et al), 156A
Endarterectomy
does carotid endarterectomy decrease stroke and death in patients with transient ischemic attacks? (Committee on Health Care Issues, American Neurological Association), HEALTH CARE ISSUES, 72
intraoperative monitoring during carotid endarterectomy (Wilkins), LETTER, 283; reply (Cho et al), LETTER, 284
value of intraoperative monitoring during carotid endarterectomy: a comment (Davenport), LETTER, 283
Endocarditis
mycotic aneurysm, subarachnoid hemorrhage, and indications for cerebral angiography in infectious endocarditis (Salgado et al), 159A
Endorphins
elevated beta-endorphins in Rett's syndrome (Myer et al), 439A
naltrexone decreases self-injurious behavior (Herman et al), 550
Enteroviruses
construction of an infectious cDNA clone of a demyelinating strain of Theiler's murine encephalomyelitis virus (Calenoff et al), 155A
Epidemiological techniques
Alzheimer's disease and other dementing illnesses in a defined United States population: incidence rates and clinical features (Schoenberg et al), 724
multiple sclerosis in Canada (Sadovnick and Sweeney), LETTER, 667; reply (Pryse-Phillips), LETTER, 667
risk factors for ischemic stroke: a prospective study in Rochester, Minnesota (Davis et al), 319
trends in the incidence rates of stroke in Rochester, Minnesota, since 1935 (Homer et al), 245
Epilepsy
analysis of the gamma-aminobutyric acid receptor system in medically intractable epilepsies: correlation with morphometric and electrographic data (Fariello et al), 133A
antiepileptic effects of fenfluramine: pilot study (Gastaut and Zifkin), 414A
"bilateral" epileptic abnormalities: a unilateral cure (Vining et al), 412A
carbamazepine and cardiac conduction disturbances (Benassi et al), 280
clinical relevance of ambulatory electroencephalographic recording in 95 epileptic and nonepileptic children (Aminoff et al), 130A
clobazam for refractory childhood seizure disorders: a valuable add-on drug (Camfield et al), 416A
comparative effects of carbamazepine, phenytoin, and phenobarbital on cognition and behavior in epileptic children (Pellock et al), 421A
effect of locus ceruleus stimulation on audiogenic seizure susceptibility in the immature genetically-epilepsy-prone rat (Thompson and Holmes), 418A
epilepsy following neonatal seizures (Clancy and Legido), 407A
fixation-off–sensitive epilepsy in eyelid myoclonia with absence seizures (Panayiotopoulos), 87
idiopathic myoclonic epilepsy of childhood (McBride), 414A
multiple brief nontemporal focal seizures in well children: a benign epileptic syndrome with apparent cure in some by a very short course of anticonvulsants (Camfield and Dooley), 414A
positron emission tomography studies of cerebral glucose

metabolism in chronic partial epilepsy (Abou-Khalil et al), 480
predicting outcome after cortical resection surgery (Somerville), LETTER, 667; reply (Dodrill), LETTER, 668; Editor's note (Asbury), LETTER, 668
pyridoxine-dependent epilepsy: new observations and clinical spectrum (Trevathan et al), 437A
seizures induced by orgasm (Berthier et al), LETTER, 394
Epilepsy, myoclonic
autopsy case of myoclonic epilepsy and ragged-red fibers with cytochrome c oxidase deficiency: evidence for a maternally inherited biochemical defect (Mendell et al), 128A
photic cortical reflex myoclonus (Shibasaki and Neshige), 252
scalp topography of giant somatosensory evoked potentials in myoclonic epilepsy (Shibasaki and Kakigi), 131A
Epilepsy, temporal lobe
hippocampal neuron loss in temporal lobe epilepsy: correlation with early childhood convulsions (Sagar and Oxbury), 334
localization of magnetic interictal discharges in temporal lobe epilepsy (Rose et al), 348
magnetic resonance imaging in temporal lobe epilepsy: pathological correlations (Kuzniecky et al), 341
Epstein-Barr virus
relationship between primary central nervous system lymphoma and Epstein-Barr virus in acquired immune deficiency syndrome: in situ hybridization studies (Murray et al), 155A
Ethylnitrosourea
effect of hyperosmotic blood–brain barrier disruption on blood-to-tissue transport in ENU-induced gliomas (Warnke et al), 300
Evoked potentials
central motor conduction in motor neuron disease (Hugon et al), 544
cognitive evoked potentials: cholinergic modulation of spectral power (Meador et al), 123A
electrophysiological indicators for attention deficit disorder—learning disability subgroups: cognitive and pharmacological evoked potentials studies (Frank et al), 440A
magnetic brain stimulation: central motor conduction studies in multiple sclerosis (Hess et al), 744
movement-related potentials recorded from scalp and subdural electrodes in humans (Lüders et al), 131A
spectral power of human limbic evoked responses: relationship to seizure onset (Meador et al), 131A
spinal evoked potentials following segmental sensory leg stimulation: a direct measure of dorsal root function (Seyal et al), 149A
Evoked potentials, auditory
abnormal brainstem auditory evoked responses in children with encephalopathy and recurrent lactic acidosis (Foley et al), 443A
brainstem auditory evoked responses before and after ventriculoperitoneal shunting in infants and children (Karmel et al), 430A
effects of hypothermia on brainstem auditory evoked potentials in humans (Markand et al), 507
Evoked potentials, somatosensory
bilateral absence of cortical somatosensory evoked potentials has a different importance in traumatic versus anoxic coma (DeLecluse et al), 142A
different scalp distribution of somatosensory evoked potentials to electrical and natural stimulation of the first and fifth digits (Cohen et al), 143A
scalp topography of giant somatosensory evoked potentials in myoclonic epilepsy (Shibasaki and Kakigi), 131A
somatosensory evoked potentials and neurological follow-up in premature infants with periventricular hemorrhage (Willis et al), 429A
Evoked potentials, visual
habituation responses in newborn term and preterm infants as measured with visual evoked potentials (Norcross and Dussack), 413A
importance of absent or very low amplitude visual evoked responses in children (Foley and Martyn), 416A
visual evoked potentials in compression of the anterior visual pathways (Staudacher and Reuther), 147A
visual evoked potentials in patients with neuropathy and macroglobulinemia (Barbieri et al), 663
Exertion
muscle energy metabolism in human phosphofructokinase deficiency as recorded by ^{31}P nuclear magnetic resonance spectroscopy (Argov et al), 46
Extracorporeal membrane oxygenation
cerebral injury and regional cerebral blood flow in newborn infants undergoing extracorporeal membrane oxygenation (Perlman et al), 421A
Eye diseases
neuroophthalmological spectrum of temporal arteritis (Mehler and Rabinowich), 147A
parkinsonism, dementia, and gaze paresis in Chamorros on Guam: a progressive supranuclear palsy-like syndrome (Tanner et al), 174A
Eyelid diseases
fixation-off–sensitive epilepsy in eyelid myoclonia with absence seizures (Panayiotopoulos), 87
Eye movements
oculogyric crisis: a syndrome of thought disorder and ocular deviation (Leigh et al), 13
oculomasticatory myorhythmia (Grotta et al), LETTER, 395
role of scanpaths in facial recognition and learning (Rizzo et al), 41
still another cause of monocular oscillopsia (Rosenberg), LETTER, 97

Fat emulsions, intravenous
neurological complications of intralipid therapy: the fat overload syndrome (Weiner et al), 452A
Fatigue
correlates of fatigue in multiple sclerosis (Leo et al), 152A
detection of Coxsackie B virus–specific RNA sequences in skeletal muscle biopsies of patients with the postviral fatigue syndrome (Bowles et al), 126A
Fenfluramine
antiepileptic effects of fenfluramine: pilot study (Gastaut and Zifkin), 414A
Frontal lobe
neurological syndrome following bilateral damage to the head of the caudate nuclei (Richfield et al), 768

GABA
analysis of the gamma-aminobutyric acid receptor system in medically intractable epilepsies: correlation with morphometric and electrographic data (Fariello et al), 133A
effect of anticonvulsants on GABAergic activity in a neuronal cell clone (Singer and Searles), 433A
Galactocerebrosides. *See* Galactosylceramides
Galactosylceramides
search for antibodies to galactocerebroside in the serum and cerebrospinal fluid in human demyelinating disorders (Rostami et al), 381

Ganglia, spinal
detection of varicella-zoster virus nucleic acid in neurons of normal human thoracic ganglia (Gilden et al), 377
spinal evoked potentials following segmental sensory leg stimulation: a direct measure of dorsal root function (Seyal et al), 149A
Gangliosidosis
determination by high-performance liquid chromatography of cerebrospinal fluid gangliosides in GM_1 and GM_2 gangliosidoses (Kaye et al), 444A
Gastric fundus, surgery
dumping syndrome following Nissen fundoplication in children with severe mental retardation and quadriparetic cerebral palsy (Wyllie et al), 453A
Gastritis
valproate-induced gastritis (Marks et al), 414A
Genetics, medical
mendelian etiologies of stroke (Natowicz and Kelley), NEUROLOGICAL PROGRESS, 175
Giant axonal neuropathy
giant axonal neuropathy: correlation of clinical findings with postmortem neuropathology (Thomas et al), 79
Giant cell, arteritis
thrombocytosis complicating giant cell arteritis (Vincent), 142A
Gilles de la Tourette's disease
clonidine in Gilles de la Tourette's syndrome (Roos et al), LETTER, 773; reply (Goetz et al), LETTER, 774
development of behavioral and social problems in Tourette's syndrome (Singer and Rosenberg), 434A
gonadotropin deficiency in Tourette's syndrome (Sandyk et al), 434A
increased plasma melanotrophic activity in Tourette's syndrome (Sandyk and Bamford), 434A
natural history of Tourette syndrome: a follow-up study (Erenberg et al), 383
use of pimozide in young children with Tourette's syndrome (Erenberg et al), 435A
Glioblastoma multiforme
supratentorial malignant gliomas in childhood: a review of fifty cases (Dropcho et al), 355
Glioma
acute and delayed neurotoxicity after infraophthalmic intracarotid BCNU and/or cisplatin for malignant glial tumors (Rogers et al), 162A
comparative ^{13}C nuclear magnetic resonance studies of gliomas with high and low tumorigenic potential (Metz et al), 163A
comparison of x-ray computed tomography and magnetic resonance imaging of brain tumor using an adult canine glioma model (Whelan et al), 407A
effect of hyperosmotic blood–brain barrier disruption on blood-to-tissue transport in ENU-induced gliomas (Warnke et al), 300
fatal necrotizing encephalopathy complicating treatment of malignant gliomas with intraarterial BCNU and irradiation: a pathological study (Delattre et al), 161A
supratentorial malignant gliomas in childhood: a review of fifty cases (Dropcho et al), 355
Glucose
differences in cerebral blood flow and glucose utilization in vegetative versus locked-in patients (Levy et al), 673
effect of glucose control on reinnervation in diabetes (Shields and Norris), 126A
experimental hemiplegia in the monkey: basal ganglia glucose activity during recovery (Gilman et al), 370
lowered cerebral glucose utilization in amyotrophic lateral sclerosis (Dalakas et al), 580
metabolic pathology of the AIDS dementia complex (Rottenberg et al), 700
positron emission tomography studies of cerebral glucose metabolism in chronic partial epilepsy (Abou-Khalil et al), 480
positron emission tomography study of human brain functional development (Chugani et al), 487
variability of cerebral glucose extraction fraction in the resting state (Tramo et al), 161A
Glucose, metabolism
acidosis corresponds with excess glucose utilization in ischemic penumbra (Peek et al), 160A
coupled increases of local cerebral glucose utilization and blood flow are elicited by a somatosensory task in normal humans (Ginsberg et al), 158A
glucose hypermetabolism of the inferior olive in patients with essential tremor (Dubinsky and Hallett), 118A
glucose hypometabolism in progressive supranuclear palsy is not limited to frontal cortex (Foster et al), 123A
inhibition of cortical and thalamic glucose metabolism (Sharp et al), 132A
interregional correlations of glucose utilization among brain regions in autistic adults (Horwitz et al), 118A
metabolic maturation of the brain: a study of local cerebral glucose utilization in the cat (Chugani et al), 439A
regional cerebral blood flow and glucose metabolism during perinatal hypoglycemia (Mujsce et al), 429A
Glucosidases
alpha-glucosidase deficiency and basilar artery aneurysm: report of a sibship (Makos et al), 629
Glutamates
abnormal glutamate metabolism in amyotrophic lateral sclerosis (Plaitakis and Caroscio), 575
Alzheimer's disease: glutamate depletion in the hippocampal perforant pathway zone (Hyman et al), 37
glutamate antagonist MK-801 attenuates perinatal hypoxic-ischemic brain injury (McDonald et al), 407A
Glutamic acid
new method to detect point mutations in the gene for glutamic acid decarboxylase in patients with pyridoxine-dependent seizures (Kaufman et al), 446A
Glutaric acid
Rett's syndrome: urine organic acid abnormalities (Chaves-Carballo), 442A
Glutaryl-CoA-dehydrogenase, urine
glutaric aciduria type I: enzymatic studies of two kindreds with four asymptomatic individuals (Amir et al), 422A
Glutathione
glutathione depletion by the radioprotective agent WR2721 (Schor), 447A
Glycogen, metabolism
regional brain glycogen metabolism during global ischemia (Swanson et al), 136A
Glycolipids
marked loss of cerebral galactolipids in Pick's disease (Scicutella and Davies), 606
Glycolysis
intracortical distribution of glycolytic enzymes in Alzheimer's disease (Sorbi et al), 123A
muscle energy metabolism in human phosphofructokinase deficiency as recorded by ^{31}P nuclear magnetic resonance spectroscopy (Argov et al), 46
Glycoproteins
glycoprotein metabolism in ceroid lipofuscinosis (Batten's disease) (Heaney-Kieras et al), 442A
myelin-associated glycoprotein in multiple sclerosis lesions: a quantitative and qualitative analysis (Möller et al), 469

visual evoked potentials in patients with neuropathy and macroglobulinemia (Barbieri et al), 663
Gonadotropins
gonadotropin deficiency in Tourette's syndrome (Sandyk et al), 434A
Guillain-Barré syndrome. *See* Polyradiculoneuritis

Habituation
habituation responses in newborn term and preterm infants as measured with visual evoked potentials (Norcross and Dussack), 413A
Hallervorden-Spatz syndrome
adult-onset central nervous system degeneration with autosomal dominant inheritance resembling Hallervorden-Spatz disease (Slopis et al), 144A
clinical, neuropsychological, and magnetic resonance imaging in Hallervorden-Spatz syndrome (Sethi et al), 146A
Hand
abnormality of reciprocal inhibition in patients with hand cramps (Panizza et al), 146A
Hashimoto's disease. *See* Thyroiditis, lymphomatous
Headache
critical look at reliability of headache diagnosis (Weeks and Rapoport), 148A
increased reactivity to HTLV-I in inflammatory nervous system diseases (Lolli et al), 67
successful treatment of spontaneous low cerebrospinal fluid pressure headache (Petersen et al), 148A
Head injuries
neuronotoxic activity in cerebrospinal fluid in head-injured patients (Moonen et al), 142A
Heart conduction system
carbamazepine and cardiac conduction disturbances (Benassi et al), 280
Heart failure, congestive
risk factors for ischemic stroke: a prospective study in Rochester, Minnesota (Davis et al), 319
Heart surgery
effects of hypothermia on brainstem auditory evoked potentials in humans (Markand et al), 507
Heart, transplantation
seizures after heart transplantation (Pavlakis et al), 438A
Hemangioma
clinical spectrum of cavernous malformations (angiomas) in childhood (Rigamonti et al), 431A
Hemiballismus
metabolism of the basal ganglia in hemiballismus (Dubinsky et al), 145A
Hemiplegia
experimental hemiplegia in the monkey: basal ganglia glucose activity during recovery (Gilman et al), 370
Hemolytic-uremic syndrome
predictors of neurological complications in hemolytic-uremic syndrome (Hahn et al), 451A
Heparin
inhibition of astrocyte mitogenesis by heparin (Robertson and Goldstein), 151A
Heparinoid
dose escalation study of Org 10172 (low-molecular-weight) heparinoid in the treatment of acute cerebral infarction (Biller et al), 159A
Herpesvirus hominis
multifocal CNS demyelination following peripheral inoculation with herpes simplex virus type 1 (Kastrukoff et al), 52
Hippocampus
age-related shrinkage of cortically projecting cholinergic neurons: a selective effect (Mesulam et al), 31
Alzheimer's disease: glutamate depletion in the hippocampal perforant pathway zone (Hyman et al), 37
hippocampal neuron loss in temporal lobe epilepsy: correlation with early childhood convulsions (Sagar and Oxbury), 334
phenylethanolamine *N*-methyltransferase activity is decreased in Alzheimer's disease brains (Burke et al), 278
HIV
HIV seropositivity in Guillain-Barré syndrome (Berger et al), LETTER, 393
HIV antigens
HIV antigen in brains of patients with AIDS (Gabuzda and Sobel), LETTER, 668
HIV protein
trophic effects of neuroleukin on central neurons and functional interactions with HIV envelope protein (Apatoff et al), 156A
HLA antigens
acetylcholine receptors in human thymic myoid cells in situ: an immunohistological study (Schluep et al), 212
induction of HLA-DR antigen expression in cultured human adult nonneoplastic glial cells (Barna et al), 152A
Homeostasis
concept of coupling blood flow to brain function: revision required? (Lou et al), NEUROLOGICAL PROGRESS, 289
Homovanillic acid
relationship of cerebrospinal fluid homovanillic acid to parkinsonian features in early Huntington's disease (Kurlan et al), 146A
HTLV-I
familial cases of HTLV-I-associated myelopathy (Miyai et al), 601
HTLV-I associated myelopathy: a report of 85 cases (Osame et al), 116A
increased reactivity to HTLV-I in inflammatory nervous system diseases (Lolli et al), 67
tropical spastic paraparesis: evidence for the etiological role of human T-cell lymphotropic virus type I in endemic foci in Jamaica and Colombia (Rodgers-Johnson et al), 116A
Human T-cell leukemia virus
familial cases of HTLV-I-associated myelopathy (Miyai et al), 601
Huntington's disease
combined positron emission tomography and DNA studies may identify recombination between the linked marker and the gene in asymptomatic individuals at risk for Huntington's disease (Martin et al), 145A
elevated serotonin and reduced dopamine in subregionally divided Huntington's disease striatum (Kish et al), 386
Huntington's disease: changes in tachykinin content in postmortem brains (Arai et al), 587
role of the D-1 dopamine receptor in the pathogenesis of Huntington's disease (Braun et al), 170A
Hydrocephalus
brainstem auditory evoked responses before and after ventriculoperitoneal shunting in infants and children (Karmel et al), 430A
factors associated with hydrocephalus in subarachnoid hemorrhage (Graff-Radford et al), 137A
reversibility of metabolic and cognitive deficits in normal pressure hydrocephalus following shunt surgery (Kaye et al), 124A
ventriculosubcutaneous shunt for hydrocephalus after intraventricular hemorrhage (Zmora et al), 423A
Hydroxyapatites
mitochondrial hydroxyapatite deposits in spinocerebellar degeneration (Munoz et al), 258

Hyperglycemia
prognostic importance of acute hyperglycemia following asphyxia in the term newborn (Roland et al), 422A
Hypertension
benign intracranial hypertension—atypical features and new risks (Lavenstein and Frey), 453A
effect on neurological function of profound decrease in arterial blood pressure in hypertensive premature newborn infants following antihypertensive therapy (Perlman and Volpe), 435A
risk factors for ischemic stroke: a prospective study in Rochester, Minnesota (Davis et al), 319
Hypoglycemia
in vivo ^{31}P and in vitro ^{1}H nuclear magnetic resonance study of brain metabolism during neonatal hypoglycemia (Young et al), 429A
in vivo ^{31}P and in vitro ^{1}H nuclear magnetic resonance study of hypoglycemia during neonatal seizure (Young et al), 622
regional cerebral blood flow and glucose metabolism during perinatal hypoglycemia (Mujsce et al), 429A
Hypogonadism
X-linked ichthyosis due to steroid sulfatase deficiency associated with hypogonadism and anosmia (Andria et al), LETTER, 98; reply (Shapiro and Yen), LETTER, 99
Hypotension, orthostatic
somatic and autonomic function in progressive autonomic failure and multiple system atrophy (Cohen et al), 692
treatment of orthostatic hypotension in familial amyloidotic polyneuropathy with L-threo-3,4-dihydroxyphenylserine (Araki et al), 171A
Hypothermia, induced
effects of hypothermia on brainstem auditory evoked potentials in humans (Markand et al), 507

Ichthyosis
X-linked ichthyosis due to steroid sulfatase deficiency associated with hypogonadism and anosmia (Andria et al), LETTER, 98; reply (Shapiro and Yen), LETTER, 99
IgA
molecular analysis of IgA in multiple sclerosis (Coyle), 154A
IgG
immunoglobulins of Lambert-Eaton myasthenic syndrome inhibit rat pituitary hormone release (Login et al), 610
intra-blood–brain barrier IgG synthesis and abnormal serum bands in patients with acquired immune deficiency syndrome, related complex, and asymptomatic HIV-positive compared to normal subjects (Tourtellotte et al), 155A
Lambert-Eaton myasthenic syndrome: I. Early morphological effects of IgG on the presynaptic membrane active zones (Fukuoka et al), 193
Lambert-Eaton myasthenic syndrome: II. Immunoelectron microscopy localization of IgG at the mouse motor endplate (Fukuoka et al), 200
serial studies of relapsing multiple sclerosis: reduced IgG secretion in vitro and reduced suppressor cell function correlate with disease activity as recognized by magnetic resonance imaging (Oger et al), 152A
IgM
intrathecal IgM synthesis in patients with Lyme disease (Kristoferitsch), LETTER, 282; reply (Link), LETTER, 282
peripheral neuropathy associated with monoclonal IgM autoantibody (Steck et al), BRIEF REVIEW, 764
severe polyneuropathy associated with massive endoneurial deposition of paraprotein in IgM gammopathy (Yee et al), 167A
visual evoked potentials in patients with neuropathy and macroglobulinemia (Barbieri et al), 663
Immunoglobulins
oligoclonal immunoglobulin bands in acquired immune deficiency syndrome and related complex (Grimaldi et al), 138A
Immunosuppression
ataxia and paraproteinemic polyneuropathy (Kelly), LETTER, 94; reply (Dalakas), LETTER, 94
Indomethacin
decrease of cerebral blood flow velocities by indomethacin (Bejar et al), 424A
prophylactic indomethacin for prevention of intraventricular hemorrhage: neurodevelopmental follow-up (Bandstra et al), 427A
randomized low-dose indomethacin trial for the prevention of intraventricular hemorrhage in very-low-birthweight neonates (Ment et al), 406A
Intelligence
intellectual sequelae of whole brain radiotherapy for children with brain tumors (Packer et al), 408A
Intensive care units, neonatal
neurobehavioral performance of high-risk infants at neonatal intensive care unit discharge (Gardner et al), 424A
Interferons
combination of retinoic acid and interferons in inhibiting proliferation of cultured human medulloblastoma cell lines (Maria et al), 449A
cortisol induction by poly ICLC: implications for clinical trials of interferon in multiple sclerosis (Bever et al), 141A
effects of interferons on Ia gene expression in human astrocytic cells (Ransohoff et al), 151A
multiple sclerosis: effect of intravenous natural beta-interferon on clinical neurofunction, magnetic resonance imaging plaque burden, intra-blood–brain barrier IgG synthesis, blood and cerebrospinal fluid cellular immunology, and visual evoked potentials (Baumhefner et al), 171A
recombinant beta interferon inhibits gamma interferon production in multiple sclerosis (Panitch et al), 139A
study of Namalwa interferon in patients with chronic progressive multiple sclerosis: clinical and magnetic resonance imaging results (Kastrukoff et al), 154A
Interferon type II
cerebrospinal fluid gamma interferon is increased in active multiple sclerosis (Sheremata et al), 153A
Interleukin 2. *See* Mitogenic factors, lymphocyte
Intracranial pressure
benign intracranial hypertension—atypical features and new risks (Lavenstein and Frey), 453A
effect of prolactin on intracranial pressure in the neonatal beagle: relationship to risk of intracranial hemorrhage (Coulter and Gooch), 426A
neurological complications of diabetic ketoacidosis independent of increased intracranial pressure (Crawford et al), 453A
Ion channels
immunoglobulins of Lambert-Eaton myasthenic syndrome inhibit rat pituitary hormone release (Login et al), 610
Ischemia
acute ischemia causes axonal stasis, swelling, attenuation, and secondary demyelination (Nukada and Dyck), 311

Jakob-Creutzfeldt syndrome
autoclaving standards for Creutzfeldt-Jakob disease agent (Taylor), LETTER, 557

electron microscopic and immunohistochemical evidence for impairment of axonal transport in Creutzfeldt-Jakob disease (Liberski et al), 157A
neuropathological and immunohistochemical changes in the trigeminal ganglia in Creutzfeldt-Jakob disease (Shankar et al), 120A
photic cortical reflex myoclonus (Shibasaki and Neshige), 252
unique structures in negatively stained preparations of tissues infected with the agents of scrapie and Creutzfeldt-Jakob disease (Narang et al), 156A

Kainic acid
ontogenetic effects of kainic acid on behavioral seizures, electroencephalographic abnormalities, and seizure susceptibility (Holmes and Thompson), 417A
Karyotyping
structural and numerical karyotypic abnormalities in childhood brain neuroectodermal tumors (Packer et al), 449A
Ketones
defects in phagocytic function induced by the ketogenic diet in children with intractable seizures (Woody and Steele), 415A
neurological complications of diabetic ketoacidosis independent of increased intracranial pressure (Crawford et al), 453A
Krabbe's disease. *See* Leukodystrophy, globoid cell
Kynurenate
kynurenate inhibition of cell excitation decreases stroke size and deficits (Germano et al), 730

Lactates
cerebrospinal fluid lactate and pyruvate in childhood neurological illnesses (Rust et al), 443A
Lactic acid
abnormal brainstem auditory evoked responses in children with encephalopathy and recurrent lactic acidosis (Foley et al), 443A
Lafora's disease. *See* Epilepsy, myoclonic
Language development disorders
autism: evolution from a mixed transcortical aphasia to an aprosodia or dysprosodia (Minshew and Payton), 409A
Language disorders
studies of cerebral metabolism and language dysfunction after acute ischemic aphasia (Kushner et al), 135A
Lead
brain cation pump inhibited by "normal" lead levels (Bertoni and Sprenkle), 143A
Learning disorders
basal forebrain–lesioned monkeys are severely impaired in tasks of association and recognition memory (Irle and Markowitsch), 735
electrophysiological indicators for attention deficit disorder–learning disability subgroups: cognitive and pharmacological evoked potentials studies (Frank et al), 440A
natural history of Tourette syndrome: a follow-up study (Erenberg et al), 383
perceptional and attentional correlates of development dyscalculia (Rosenberger and Jeffery), 411A
Leigh disease
cytochrome *c* oxidase deficiency in Leigh syndrome (DiMauro et al), 498
Leigh's syndrome and cytochrome *c* oxidase deficiency (DeVivo et al), 445A
Leukemia, lymphoblastic
microcephaly and impaired cognitive function among survivors of acute lymphoblastic leukemia who received prophylactic cranial irradiation (Urion et al), 448A
Leukodystrophy, globoid cell
adult-onset Krabbe's disease: clinical and biochemical features of an unusual case (Boustany et al), 167A
Leukoencephalopathy
parainflammatory demyelinating leukoencephalopathy of childhood: clinical and magnetic resonance imaging findings (Marks et al), 432A
Levodopa
comparison of controlled-release Sinemet 50/200 mg with standard Sinemet 25/100 mg in Parkinson's disease (Lieberman et al), 173A
does papaverine interact with levodopa in Parkinson's disease? (Montastruc et al), LETTER, 558
duodenal delivery of levodopa in parkinsonism: efficacy and pharmacokinetic studies (Kurlan et al), 170A
effect of levodopa treatment on contrast sensitivity in Parkinson's disease (Bulens et al), 365
factors that influence the occurrence of response variations in Parkinson's disease (de Jong et al), 4
initial response to L-dopa in Parkinson's disease (Gancher and Nutt), 173A
long-term duodenal infusion of levodopa for on-off phenomena in parkinsonism: continued good clinical response associated with gradually declining levodopa intake (Sage et al), 173A
motor fluctuations in Parkinson's disease: pathogenic and therapeutic studies (Mouradian et al), 475
on-off phenomenon: relation to levodopa pharmacokinetics and pharmacodynamics (Nutt), BRIEF REVIEW, 535
pharmacokinetic study of controlled release levodopa/carbidopa (CR4-Sinemet) versus traditional Sinemet (Goetz et al), 170A
results of long-term treatment with controlled release levodopa/carbidopa (Cedarbaum et al), 145A
to treat early or to treat late? (Duvoisin), EDITORIAL, 2
Limbic system
spectral power of human limbic evoked responses: relationship to seizure onset (Meador et al), 131A
Lipodystrophy, intestinal
oculomasticatory myorhythmia (Grotta et al), LETTER, 395
Lipoma
surgical management of tethered cords in children with lipomyelomeningocele produces improved neurological outcome (Miller and Nagib), 435A
Lorazepam
lorazepam versus diazepam in status epilepticus in children (Giang and McBride), 415A
treatment of neonatal seizures with lorazepam (Roddy et al), 412A
Lumbosacral plexus
lumbosacral plexopathy: clinical subgroups and long-term follow-up (Shukla et al), 165A
Lupus
lupus inhibitor and brain ischemia (Kushner et al), 115A
Lupus erythematosus, systemic
cerebrovascular disease and systemic lupus erythematosus (Kujala), LETTER, 396; cerebrovascular disease and systemic lupus erythematosus (Asherson and Gledhill), LETTER, 397; reply (Shiozawa et al), LETTER, 397
Lyme disease
intrathecal IgM synthesis in patients with Lyme disease (Kristoferitsch), LETTER, 282; reply (Link), LETTER, 282
Lymphocytes
blood lymphocyte level and prognosis in chronic progressive multiple sclerosis (Cook et al), 140A

Lymphocytes *(continued)*
lymphocyte β-adrenergic receptors in multiple sclerosis (Arnason et al), 117A
multiplex labeling analysis of peripheral blood lymphocytes in multiple sclerosis (Kastrukoff et al), 138A
total lymphoid irradiation in multiple sclerosis: blood lymphocytes and clinical course (Cook et al), 634
Lymphocytes, ultrastructure
histological confirmation of the neuronal ceroid lipofuscinoses (Dyken), 443A
Lymphoid tissue
total lymphoid irradiation in multiple sclerosis: blood lymphocytes and clinical course (Cook et al), 634
treatment of refractory polymyositis/dermatomyositis with total lymphoid irradiation (Rosenberg et al), 138A
Lymphoma
primary central nervous system lymphoma: unusual but characteristic clinical presentations (O'Neill et al) 162A
relationship between primary central nervous system lymphoma and Epstein-Barr virus in acquired immune deficiency syndrome: in situ hybridization studies (Murray et al), 155A

Macroglobulinemia
mononeuritis multiplex in Waldenström's macroglobulinemia (Lamarca et al), 268
visual evoked potentials in patients with neuropathy and macroglobulinemia (Barbieri et al), 663
Macrophages
role of macrophages in experimental allergic neuritis induced by a P_2-specific T-cell line (Heininger et al), 117A
Magnetics
magnetic brain stimulation: central motor conduction studies in multiple sclerosis (Hess et al), 744
Magnetoencephalography
localization of magnetic interictal discharges in temporal lobe epilepsy (Rose et al), 348
Mal de debarquement syndrome
persistent mal de debarquement syndrome (Brown and Blaloh), 147A
Mamillary bodies
mamillary body atrophy in Wernicke's encephalopathy: antemortem identification using magnetic resonance imaging (Charness and DeLaPaz), 595
Masticatory muscles
oculomasticatory myorhythmia (Grotta et al), LETTER, 395
Measles virus
quantitation of antibodies to matrix protein of measles virus in the serum and cerebrospinal fluid of patients with subacute sclerosing panencephalitis (Dhib-Jalbut et al), 154A
Medulla oblongata
unilateral asterixis due to ipsilateral lesions in the pons and medulla (Peterson and Peterson), 661
Medulloblastoma
combination of retinoic acid and interferons in inhibiting proliferation of cultured human medulloblastoma cell lines (Maria et al), 449A
efficacy of adjuvent chemotherapy for patients with "poor risk" primitive neuroectodermal tumors/medulloblastoma (Siegel et al), 449A
Melanins, blood
increased plasma melanotrophic activity in Tourette's syndrome (Sandyk and Bamford), 434A
Membranes
platelet membrane abnormality in Alzheimer's disease (Zubenko et al), 237
Memory
effects of oral physostigmine in Alzheimer's disease (Stern et al), 306
Memory disorders
Alzheimer's disease: glutamate depletion in the hippocampal perforant pathway zone (Hyman et al), 37
basal forebrain–lesioned monkeys are severely impaired in tasks of association and recognition memory (Irle and Markowitsch), 735
cholinergic-dependent cognitive deficits in Parkinson's disease (Dubois et al), 26
Meningitis
three acute phase reactant proteins in the diagnosis of bacterial meningitis (Larsen and DeLallo), 454A
Meningoencephalitis
increased reactivity to HTLV-I in inflammatory nervous system diseases (Lolli et al), 67
Meningomyelocele
surgical management of tethered cords in children with lipomyelomeningocele produces improved neurological outcome (Miller and Nagib), 435A
Metabolism, inborn errors
neonatal metabolic disorders masquerading as structural central nervous system anomalies (Weinstein and Novotny), 406A
Methamphetamine
cocaine and methamphetamine exposure in neonates: perinatal consequences (Oro and Dixon), 428A
Methylmalonic acid
methylmalonic acid, methanol, metabolic acidosis, and lesions of the basal ganglia (Rosenberg), LETTER, 96; reply (Korf et al), LETTER, 96
Methylphenidate
neurochemical influences of stimulants in children with attention deficit disorder: d-amphetamine versus methylphenidate effects on plasma and urinary monoamines and metabolites (Shaywitz et al), 409A
use of methylphenidate in children with seizures and attention deficit disorder (Crumrine et al), 441A
Microcephaly
microcephaly and impaired cognitive function among survivors of acute lymphoblastic leukemia who received prophylactic cranial irradiation (Urion et al), 448A
Microscopy, electron
Lambert-Eaton myasthenic syndrome: II. Immunoelectron microscopy localization of IgG at the mouse motor endplate (Fukuoka et al), 200
Migraine
cerebral vascular reactivity in migraineurs as measured by transcranial Doppler ultrasound (Thomas and Harpold), 148A
transient global amnesia: the electroencephalogram at onset (Cole et al), 771
Mitochondria
cytochrome *c* oxidase deficiency in Leigh syndrome (DiMauro et al), 498
positron emission tomography using pyruvate-1-^{11}C of mitochondrial encephalomyopathies (Sakuragawa et al), 442A
Mitochondria, muscle
mitochondrial hydroxyapatite deposits in spinocerebellar degeneration (Munoz et al), 258
Mitogenic factors, lymphocyte
soluble IL-2 receptors in acute and subacute encephalitis (Boutin et al), 658
Monoamines
cerebrospinal fluid monoamine metabolites and somato-

statin in dominantly inherited Alzheimer's disease (Polinsky et al), 121A
Motion
persistent mal de debarquement syndrome (Brown and Blaloh), 147A
Motor cortex
magnetic brain stimulation: central motor conduction studies in multiple sclerosis (Hess et al), 744
survival of NADPH-diaphorase-positive and peptidergic neurons in fetal cortex transplanted to injured motor cortex in adult rats (Gonzalez and Sharp), 149A
Motor endplate
Lambert-Eaton myasthenic syndrome: I. Early morphological effects of IgG on the presynaptic membrane active zones (Fukuoka et al), 193
Lambert-Eaton myasthenic syndrome: II. Immunoelectron microscopy localization of IgG at the mouse motor endplate (Fukuoka et al), 200
Motor neurons
anti-GM_1 antibodies in motor neuron disease patients without plasma cell dyscrasia (Shy et al), 167A
central motor conduction in motor neuron disease (Hugon et al), 544
"denervation" in stroke patients with corticospinal lesions (Uncini et al), 125A
lowered cerebral glucose utilization in amyotrophic lateral sclerosis (Dalakas et al), 580
motor neuron disease after cervical spinal cord trauma (Munsat et al), 127A
possible role of low dietary calcium in the evolution of motor neuron disease: a primate model (Shankar et al), 119A
slow axonal transport is normal in the unaffected hindlimbs in wobbler mouse motor neuron disease (Kurahashi et al), 126A
Motor skills
kinematic properties of motor skill acquisition in children (Kerman and Pincince), 410A
Movement
motor fluctuations in Parkinson's disease: pathogenic and therapeutic studies (Mouradian et al), 475
movement-related potentials recorded from scalp and subdural electrodes in humans (Lüders et al), 131A
on-off phenomenon: relation to levodopa pharmacokinetics and pharmacodynamics (Nutt), BRIEF REVIEW, 535
Movement disorders
movement disorder in premature infants with severe bronchopulmonary dysplasia: a new syndrome (Perlman et al), 427A
peripheral trauma-induced abnormal involuntary movements: analysis of predisposing factors (Vander Linden et al), 174A
Multiple births
prenatal white matter necrosis in multiple gestations (Bejar et al), 425A
Multiple sclerosis
blood lymphocyte level and prognosis in chronic progressive multiple sclerosis (Cook et al), 140A
cerebrospinal fluid bands are not meaningless in multiple sclerosis (Currier et al), 153A
cerebrospinal fluid gamma interferon is increased in active multiple sclerosis (Sheremata et al), 153A
correlates of fatigue in multiple sclerosis (Leo et al), 152A
cortisol induction by poly ICLC: implications for clinical trials of interferon in multiple sclerosis (Bever et al), 141A
diagnostic criteria for multiple sclerosis: an addendum (Poser), LETTER, 773
features of connective tissue disease in unselected multiple sclerosis patients (Aisen et al), 151A
immune regulation in multiple sclerosis patients treated with cyclosporine (Kerman et al), 154A
increased reactivity to HTLV-I in inflammatory nervous system diseases (Lolli et al), 67
in vivo labeling of blood T cells: rapid traffic into cerebrospinal fluid in multiple sclerosis (Hafler and Weiner), 89
lymphocyte β-adrenergic receptors in multiple sclerosis (Arnason et al), 117A
magnetic brain stimulation: central motor conduction studies in multiple sclerosis (Hess et al), 744
magnetic resonance imaging in isolated noncompressive spinal cord syndromes (Miller et al), 714
magnetic resonance imaging in multiple sclerosis: decreased signal in thalamus and putamen (Drayer et al), 546
molecular analysis of IgA in multiple sclerosis (Coyle), 154A
multifocal CNS demyelination following peripheral inoculation with herpes simplex virus type 1 (Kastrukoff et al), 52
multiple sclerosis: effect of intravenous natural beta-interferon on clinical neurofunction, magnetic resonance imaging plaque burden, intra-blood–brain barrier IgG synthesis, blood and cerebrospinal fluid cellular immunology, and visual evoked potentials (Baumhefner et al), 171A
multiple sclerosis in Canada (Sadovnick and Sweeney), LETTER, 667; reply (Pryse-Phillips), LETTER, 667
multiplex labeling analysis of peripheral blood lymphocytes in multiple sclerosis (Kastrukoff et al), 138A
myelin-associated glycoprotein in multiple sclerosis lesions: a quantitative and qualitative analysis (Möller et al), 469
myelin basic protein fragments in urine (Norton), EDITORIAL, 656
no change in clinical course of patients with multiple sclerosis after stopping azathioprine treatment (Myers et al), 153A
peripheral manifestations of multiple sclerosis (Zee et al), 139A
presence of immunoreactive myelin basic protein peptide in urine of persons with multiple sclerosis (Whitaker), 648
recombinant beta interferon inhibits gamma interferon production in multiple sclerosis (Panitch et al), 139A
search for antibodies to galactocerebroside in the serum and cerebrospinal fluid in human demyelinating disorders (Rostami et al), 381
serial studies of relapsing multiple sclerosis: reduced IgG secretion in vitro and reduced suppressor cell function correlate with disease activity as recognized by magnetic resonance imaging (Oger et al), 152A
study of Namalwa interferon in patients with chronic progressive multiple sclerosis: clinical and magnetic resonance imaging results (Kastrukoff et al), 154A
total lymphoid irradiation in multiple sclerosis: blood lymphocytes and clinical course (Cook et al), 634
Mumps virus
localization of mumps virus structural proteins with monoclonal antibodies in muscles of inclusion body myositis (Chou and Örvell), 129A
Muscle cramp
abnormality of reciprocal inhibition in patients with hand cramps (Panizza et al), 146A
botulinum toxin in writer's cramp: a pilot study (Tsui et al), 147A

Muscles
effect of tetrodotoxin-induced paralysis on expression of muscle-"specific" isozymes and acetylcholinesterase in innervated cultured human muscle fibers (Martinuzzi et al), 163A
Muscle spasticity
idiopathic progressive spastic paraplegia seen in childhood (Appleton et al), 452A
Muscular atrophy
castration reduces the rate of denervation atrophy of skeletal muscle fibers in rat solei and plantares (Karpati et al), 169A
radiological and magnetic resonance imaging study of juvenile type distal and segmental muscular atrophy of the upper extremities (Mukai et al), 166A
Muscular diseases
chronic muscle weakness caused by *Borrelia burgdorferi* meningoradiculitis (Wokke et al), 389
clinical heterogeneity in autosomal dominant myopathies (Fries et al), LETTER, 393; reply (Chutkow), LETTER, 393
familial cases of HTLV-I-associated myelopathy (Miyai et al), 601
muscle energy metabolism in human phosphofructokinase deficiency as recorded by ^{31}P nuclear magnetic resonance spectroscopy (Argov et al), 46
treatment of refractory polymyositis/dermatomyositis with total lymphoid irradiation (Rosenberg et al), 138A
Muscular dystrophy
immunohistochemical identification and quantitation of mononuclear cells in facioscapulohumeral muscular dystrophy (Arahata et al), 165A
Muscular dystrophy, Duchenne
are deletion mutations etiological in the majority of Duchenne dystrophy patients? (Bartlett et al), 119A
cloning of myogenic cells of Duchenne muscular dystrophy by the transfection of origin-defective simian virus DNA (Nakamigawa et al), 447A
DNA deletion in a Pakistani family with Duchenne muscular dystrophy (Siddique et al), 127A
reduced accumulation of creatine kinase-MM in muscle fibers cultured in monolayer and innervated long-term from Duchenne muscular dystrophy patients (Askanas et al), 129A
six-month trial of prednisone in Duchenne muscular dystrophy (Brooke et al), 120A
Muscular dystrophy, familial and genetic
genetic heterogeneity in Duchenne dystrophy (Hyser et al), 553
Musicians
peripheral nerve disorders in instrumental musicians (Lederman), 125A
Myasthenia gravis
acetylcholine receptors in human thymic myoid cells in situ: an immunohistological study (Schluep et al), 212
antibodies against extracted skeletal muscle antigens in myasthenia gravis (Ashizawa et al), 140A
immunoglobulins of Lambert-Eaton myasthenic syndrome inhibit rat pituitary hormone release (Login et al), 610
Lambert-Eaton myasthenic syndrome: I. Early morphological effects of IgG on the presynaptic membrane active zones (Fukuoka et al), 193
Lambert-Eaton myasthenic syndrome: II. Immunoelectron microscopy localization of IgG at the mouse motor endplate (Fukuoka et al), 200
myasthenia gravis with circulating antibodies to the human acetylcholine receptor: in vitro B cell functional studies (Oger and Kaufman), 140A
proliferative response of blood cells of patients with myasthenia gravis to purified mammalian acetylcholine receptor (Sisley et al), 139A
seronegative myasthenia gravis (Sanders et al), 126A
transcervical thymectomy for myasthenia gravis (Humphrey et al), 166A
unusual electrophysiological and morphological features in a patient with acquired seronegative myasthenia gravis (Maselli et al), 164A
Myelin basic proteins. *See* Encephalitogenic basic proteins, urine
Myelin proteins
characterization of a cDNA clone encoding myelin P_2 protein (Narayanan et al), 446A
highly variable region of DNA length polymorphism located adjacent to the human myelin basic protein gene (Boylan et al), 139A
immunocytochemistry in X-linked myelin-deficient mutants (Koeppen et al), 142A
molecular cloning of a cDNA encoding rabbit myelin P_2 protein (Narayanan et al), 150A
visual evoked potentials in patients with neuropathy and macroglobulinemia (Barbieri et al), 663
Myoadenylate deaminase
myoadenylate deaminase deficiency: ^{31}P nuclear magnetic resonance spectroscopy investigation (Gross et al), 128A
Myoclonus
fixation-off–sensitive epilepsy in eyelid myoclonia with absence seizures (Panayiotopoulos), 87
idiopathic myoclonic epilepsy of childhood (McBride), 414A
photic cortical reflex myoclonus (Shibasaki and Neshige), 252
prominence of negative myoclonus in the treatment-resistant motor disturbances of postanoxic myoclonus (Hening et al), 174A
serotonin hypothesis of infantile spasms: regional studies of corticotropin effects in vitro and in vivo on serotonin receptors in the neonatal and adult rat central nervous system (Pranzatelli), 437A
Myositis
inflammatory myopathies of childhood: diagnosis and follow-up by computerized realtime sonography (Fischer et al), 451A
localization of mumps virus structural proteins with monoclonal antibodies in muscles of inclusion body myositis (Chou and Örvell), 129A
Myotonia
molecular mechanisms of chemically inducted myotonia: studies in a new in vitro model (Koenig et al), 166A
severe myotonia relieved by nifedipine (Grant and Weir), LETTER, 395
Myotonia atrophica
clinical heterogeneity in autosomal dominant myopathies (Fries et al), LETTER, 393; reply (Chutkow), LETTER, 393

NADPH hydrogenase
selective sparing of NADPH-diaphorase–reactive neurons in neonatal hypoxic-ischemic injury (Ferriero et al), 135A
survival of NADPH-diaphorase-positive and peptidergic neurons in fetal cortex transplanted to injured motor cortex in adult rats (Gonzalez and Sharp), 149A
Naloxone
naloxone nonstereospecifically attenuates hypoxic cortical neuronal injury in vitro (Goldberg et al), 116A

Naltrexone
naltrexone decreases self-injurious behavior (Herman et al), 550
Narcotics
opiate drugs alter expression of genes for opioid peptides (Uhl et al), 118A
Necrosis
cavitary white matter necrosis: early neurodevelopmental outcome (Vaucher et al), 436A
prenatal white matter necrosis in multiple gestations (Bejar et al), 425A
Neoplasm metastasis
spinal epidural metastases (Nardone), LETTER, 556; reply (Rodichok), LETTER, 556
Nerve fibers
physiological effects of 4-aminopyridine on demyelinated mammalian motor and sensory fibers (Bowe et al), 264
Nerve tissue proteins
Huntington's disease: changes in tachykinin content in postmortem brains (Arai et al), 587
Neural conduction
magnetic brain stimulation: central motor conduction studies in multiple sclerosis (Hess et al), 744
prospective nerve conduction studies in cisplatin therapy (Riggs et al), 166A
Neural transmission
effect of parathyroid hormone on fast axonal transport in human nerve (Breuer and Atkinson), 128A
Neuritis, experimental allergic
role of macrophages in experimental allergic neuritis induced by a P_2-specific T-cell line (Heininger et al), 117A
Neuroaxonal dystrophy
computed tomographic and magnetic imaging in twins with neuroaxonal dystrophy (Barlow et al), 444A
Neurofibrils
anatomy of cholinesterase inhibition in Alzheimer's disease: effect of physostigmine and tetrahydroaminoacridine on plaques and tangles (Mesulam et al), 683
axonal disruption and aberrant localization of tau protein characterize the neuropil pathology of Alzheimer's disease (Kowall and Kosik), 639
cholinesterases within neurofibrillary tangles related to age and Alzheimer's disease (Mesulam and Morán), 223
immunocytochemical characterization of neurofibrillary tangles in amyotrophic lateral sclerosis and parkinsonism-dementia of Guam (Yanagihara et al), 120A
tau antisera recognize neurofibrillary tangles in a range of neurodegenerative disorders (Joachim et al), 514
Neuroglia
glial mediation of neural microvessel endothelial cell adhesion (Laterra and Goldstein), 150A
induction of HLA-DR antigen expression in cultured human adult nonneoplastic glial cells (Barna et al), 152A
Neurological examination
development of a scoring system for neurological assessment of 4-year-olds (Ellison et al), 411A
neurobehavioral performance of high-risk infants at neonatal intensive care unit discharge (Gardner et al), 424A
Neurological manifestations
neurological and cognitive deficits in cystinosis (Trauner et al), 441A
neurological outcome after electroencephalograph-proven neonatal seizures (Clancy and Legido), 429A
predictors of neurodevelopmental outcome at age 4 years following intrapartum asphyxia (Shankaran et al), 424A
quantitative cerebral blood flow and neurological outcome in newborn infants (Altman et al), 426A
Neuromuscular diseases
autosomal dominant cytoplasmic body myopathy (Dickoff et al), 125A
delayed onset of distal axonal dysfunction in primates after prolonged low-level intoxication with acrylamide (Schaumburg et al), 130A
muscle carnitine deficiency in neurogenic atrophy (Amit et al), 450A
peripheral neuropathy with agenesis of the corpus callosum: a unique clinicopathological entity (Carpenter et al), 125A
slow axonal transport is normal in the unaffected hindlimbs in wobbler mouse motor neuron disease (Kurahashi et al), 126A
treatable chronic, multifocal motor polyneuropathy associated with antibodies to a defined neural antigen (Pestronk et al), 119A
Neuronal ceroid-lipofuscinosis
glycoprotein metabolism in ceroid lipofuscinosis (Batten's disease) (Heaney-Kieras et al), 442A
histological confirmation of the neuronal ceroid lipofuscinoses (Dyken), 443A
Neurons
concept of coupling blood flow to brain function: revision required? (Lou et al), NEUROLOGICAL PROGRESS, 289
neuronotoxic activity in cerebrospinal fluid of head-injured patients (Moonen et al), 142A
Neuropsychological disorders
association of specific patterns of cerebral asymmetry with neuropsychological deficits (Voeller), 409A
neuropsychological deficits in olivopontocerebellar atrophy: implications for the cholinergic hypothesis of Alzheimer's dementia (Kish et al), 121A
Neuropsychological tests
neuropsychological memory tests in the diagnosis of early Alzheimer's disease (Petersen et al), 123A
Neuroregulators
cerebrospinal fluid neurotransmitter markers in the myoclonic subtype of dementia of the Alzheimer type (Kaye et al), 121A
neurotransmitters modulate Ca^{2+} influx and transport processes in brain capillaries: a new model for blood–brain barrier regulation (Koenig et al), 137A
Neurotoxins
asymptomatic unilateral MPTP lesions visualized in vivo by fluorodopa positron emission tomographic scans in cynomolgus monkeys (Guttman et al), 172A
Nifedipine
severe myotonia relieved by nifedipine (Grant and Weir), LETTER, 395
Nitrogen mustard compounds
nitrogen mustard vincristine procarbazine and prednisone (MOPP) in treatment of recurrent brain tumors of childhood (Baram et al), 450A
Nitrosourea compounds
acute and delayed neurotoxicity after infraophthalmic intracarotid BCNU and/or cisplatin for malignant glial tumors (Rogers et al), 162A
fatal necrotizing encephalopathy complicating treatment of malignant gliomas with intraarterial BCNU and irradiation: a pathological study (Delattre et al), 161A
Nuclear magnetic resonance
adrenoleukodystrophy-adrenomyeloneuropathy carrier detection by magnetic resonance imaging (Snyder and Orrison), 444A

Nuclear magnetic resonance *(continued)*
clinical, neuropsychological, and magnetic resonance imaging in Hallervorden-Spatz syndrome (Sethi et al), 146A
clinical spectrum of cavernous malformations (angiomas) in childhood (Rigamonti et al), 431A
comparative ^{13}C nuclear magnetic resonance studies of gliomas with high and low tumorigenic potential (Metz et al), 163A
comparative magnetic resonance and computed tomographic brain imaging in Sturge-Weber syndrome (Chamberlain and Press), 431A
computed tomographic and magnetic imaging in twins with neuroaxonal dystrophy (Barlow et al), 444A
diagnosis of dural venous sinus thrombosis by magnetic resonance imaging (Moots et al), 431A
in vivo ^{31}P and in vitro ^{1}H nuclear magnetic resonance study of brain metabolism during neonatal hypoglycemia (Young et al), 429A
in vivo ^{31}P and in vitro ^{1}H nuclear magnetic resonance study of hypoglycemia during neonatal seizure (Young et al), 622
magnetic resonance imaging in isolated noncompressive spinal cord syndromes (Miller et al), 714
magnetic resonance imaging in multiple sclerosis: decreased signal in thalamus and putamen (Drayer et al), 546
magnetic resonance imaging in temporal lobe epilepsy: pathological correlations (Kuzniecky et al), 341
magnetic resonance imaging of experimental demyelinating lesions (Ford et al), 151A
mamillary body atrophy in Wernicke's encephalopathy: antemortem identification using magnetic resonance imaging (Charness and DeLaPaz), 595
metabolic changes after experimental spinal cord injury: assessment by magnetic resonance spectroscopy (Faden et al), 118A
muscle energy metabolism in human phosphofructokinase deficiency as recorded by ^{31}P nuclear magnetic resonance spectroscopy (Argov et al), 46
myoadenylate deaminase deficiency: ^{31}P nuclear magnetic resonance spectroscopy investigation (Gross et al), 128A
new and characteristic diagnostic features of periventricular leukomalacia on magnetic resonance imaging (Hill et al), 423A
^{31}P and ^{1}H nuclear magnetic resonance study of the effect of diazepam on neonatal seizure (Young et al), 420A
parainflammatory demyelinating leukoencephalopathy of childhood: clinical and magnetic resonance imaging findings (Marks et al), 432A
radiological and magnetic resonance imaging study of juvenile type distal and segmental muscular atrophy of the upper extremities (Mukai et al), 166A
serial studies of relapsing multiple sclerosis: reduced IgG secretion in vitro and reduced suppressor cell function correlate with disease activity as recognized by magnetic resonance imaging (Oger et al), 152A
study of Namalwa interferon in patients with chronic progressive multiple sclerosis: clinical and magnetic resonance imaging results (Kastrukoff et al), 154A
transverse sinus thrombosis in newborns: clinical and magnetic resonance imaging findings (Baram et al), 425A
Nystagmus
hemi-see-saw nystagmus due to unilateral diencephalic lesion: a novel eye movement disorder (Halmagyi et al), 147A
internuclear ophthalmoplegia (Burde), LETTER, 668; reply (Zee), LETTER, 669
Occipital lobe
photic cortical reflex myoclonus (Shibasaki and Neshige), 252
Oculogyric crisis
oculogyric crisis: a syndrome of thought disorder and ocular deviation (Leigh et al), 13
Oligodendroglioma
chemotherapy for recurrent malignant oligodendroglioma (Macdonald and Cairncross), 162A
Olivary nucleus
brain choline acetyltransferase reduction in dominantly inherited olivopontocerebellar atrophy (Kish et al), 272
Omentum
collagen-omentum repair after experimental spinal cord transection (de la Torre and Goldsmith), 141A
Ophthalmoplegia
internuclear ophthalmoplegia (Burde), LETTER, 668; reply (Zee), LETTER, 669
Optic neuritis
electrophysiological assessment of antioxidant therapy in optic neuritis (Guy et al), 152A
Orgasm
seizures induced by orgasm (Berthier et al), LETTER, 394
Osmosis
effect of hyperosmotic blood–brain barrier disruption on blood-to-tissue transport in ENU-induced gliomas (Warnke et al), 300
is there a therapeutic role for osmotic breaching of the blood–brain barrier? (Fishman), EDITORIAL, 298
Ovarian neoplasms
immunofluorescent labeling of Purkinje and other cerebellar cell types with antibody eluted from a malignant ovarian neoplasm (Greenlee and Brashear), 163A

Papaverine
does papaverine interact with levodopa in Parkinson's disease? (Montastruc et al), LETTER, 558
Paraneoplastic syndromes
isolation of cDNA clone coding for possible autoimmune target proteins in paraneoplastic subacute sensory neuropathy (Dropcho), 163A
Paraplegia
idiopathic progressive spastic paraplegia seen in childhood (Appleton et al), 452A
Paraproteinemias
ataxia and paraproteinemic polyneuropathy (Kelly), LETTER, 94; reply (Dalakas), LETTER, 94
Parasympatholytics
cholinergic-dependent cognitive deficits in Parkinson's disease (Dubois et al), 26
oculogyric crisis: a syndrome of thought disorder and ocular deviation (Leigh et al), 13
Parathyroid hormones
effect of parathyroid hormone on fast axonal transport in human nerve (Breuer and Atkinson), 128A
parathyroid and vitamin D metabolism in amyotrophic lateral sclerosis (Glasberg et al), 127A
Parkinson's disease
aminergic systems in Alzheimer's disease and Parkinson's disease (D'Amato et al), 229
cholinergic-dependent cognitive deficits in Parkinson's disease (Dubois et al), 26
coexisting dementia and depression in Parkinson's disease: "double trouble" (Mayeux et al), 134A
comparison of controlled-release Sinemet 50/200 mg with standard Sinemet 25/100 mg in Parkinson's disease (Lieberman et al), 173A

deprenyl for the "on-off" effect complicating Parkinson's disease: multicenter double-blind study (Golbe et al), 144A
does papaverine interact with levodopa in Parkinson's disease? (Montastruc et al), LETTER, 558
duodenal delivery of levodopa in parkinsonism: efficacy and pharmacokinetic studies (Kurlan et al), 170A
effect of levodopa treatment on contrast sensitivity in Parkinson's disease (Bulens et al), 365
factors that influence the occurrence of response variations in Parkinson's disease (de Jong et al), 4
immunocytochemical characterization of neurofibrillary tangles in amyotrophic lateral sclerosis and parkinsonism-dementia of Guam (Yanagihara et al), 120A
initial response to L-dopa in Parkinson's disease (Gancher and Nutt), 173A
intracerebral dialysis in 1-methyl-4-phenyl-1,2,3,6-tetrahydropyridine parkinsonian primates (Alexander et al), 144A
long-term duodenal infusion of levodopa for on-off phenomena in parkinsonism: continued good clinical response associated with gradually declining levodopa intake (Sage et al), 173A
more on ciladopa (Snider), LETTER, 558; reply (Aminoff and Goodin), LETTER, 558
motor fluctuations in Parkinson's disease: pathogenic and therapeutic studies (Mouradian et al), 475
multi-center study of Parkinson mortality with early versus late dopa treatment (Diamond et al), 8
on-off phenomenon: relation to levodopa pharmacokinetics and pharmacodynamics (Nutt), BRIEF REVIEW, 535
parkinsonism, dementia, and gaze paresis in Chamorros on Guam: a progressive supranuclear palsy-like syndrome (Tanner et al), 174A
progabide in Parkinson's disease (Luquin et al), LETTER, 284
relationship of cerebrospinal fluid homovanillic acid to parkinsonian features in early Huntington's disease (Kurlan et al), 146A
results of long-term treatment with controlled release levodopa/carbidopa (Cedarbaum et al), 145A
tau antisera recognize neurofibrillary tangles in a range of neurodegenerative disorders (Joachim et al), 514
to treat early or to treat late? (Duvoisin), EDITORIAL, 2
transplantation in Parkinson's disease: two cases of adrenal medullary grafts to the putamen (Lindvall et al), 457
young-onset Parkinson's disease: a neurological and neuropsychological study (Ballard), 173A

Pentylenetetrazol
functional anatomy of pentylenetetrazol and electroshock seizures in the rat brainstem (Miller et al), 615
kindled seizure model induced by pentylenetetrazol in rats (Ono and Walson), 416A

Peripheral nerve diseases
multifocal CNS demyelination following peripheral inoculation with herpes simplex virus type 1 (Kastrukoff et al), 52
peripheral nerve disorders in instrumental musicians (Lederman), 125A
peripheral nerve vasculitis: immune characterization of vascular lesions (Riethman et al), 119A
peripheral neuropathy associated with monoclonal IgM autoantibody (Steck et al), BRIEF REVIEW, 764
severe polyneuropathy associated with massive endoneurial deposition of paraprotein in IgM gammopathy (Yee et al), 167A
visual evoked potentials in patients with neuropathy and macroglobulinemia (Barbieri et al), 663

Peripheral nerves
peripheral trauma-induced abnormal involuntary movements: analysis of predisposing factors (Vander Linden et al), 174A

Periventricular leukomalacia
antenatal periventricular white matter infarction (Roland et al), 423A
longitudinal neurodevelopmental study of infants with large posthemorrhagic ventriculomegaly and periventricular leukomalacia (Torres et al), 426A
new and characteristic diagnostic features of periventricular leukomalacia on magnetic resonance imaging (Hill et al), 423A

Phagocytosis
defects in phagocytic function induced by the ketogenic diet in children with intractable seizures (Woody and Steele), 415A

Phenobarbital
phenobarbital serum concentration and response in neonatal seizures (Gilman et al), 417A

Phenobarbital, adverse effects
phenobarbital rheumatism in primary brain tumor patients (Taylor et al), 117A

Phenobarbital, blood
seizures during barbiturate withdrawal: relation to blood level (Theodore et al), 644

Phenylethanolamine *N*-methyltransferase
phenylethanolamine *N*-methyltransferase activity is decreased in Alzheimer's disease brains (Burke et al), 278

Phenylketonuria
neurology of adult phenylketonuria: normalization of cerebrospinal fluid neurotransmitters with dietary therapy (Villasana et al), 143A

Phenytoin
comparative effects of carbamazepine, phenytoin, and phenobarbital on cognition and behavior in epileptic children (Pellock et al), 421A
kinetics of phenytoin uptake during status epilepticus (Simon et al), 132A

Phosphofructokinase
muscle energy metabolism in human phosphofructokinase deficiency as recorded by ^{31}P nuclear magnetic resonance spectroscopy (Argov et al), 46

Phospholipids
cerebrovascular disease and systemic lupus erythematosus (Kujala), LETTER, 396; cerebrovascular disease and systemic lupus erythematosus (Asherson and Gledhill), LETTER, 397; reply (Shiozawa et al), LETTER, 397
neurological manifestations associated with antiphospholipid antibodies (Levine and Welch), 161A

Photic stimulation
photic cortical reflex myoclonus (Shibasaki and Neshige), 252

Physostigmine
anatomy of cholinesterase inhibition in Alzheimer's disease: effect of physostigmine and tetrahydroaminoacridine on plaques and tangles (Mesulam et al), 683
effects of oral physostigmine in Alzheimer's disease (Stern et al), 306

Pick's disease. *See* Dementia, presenile

Pimozide
use of pimozide in young children with Tourette's syndrome (Erenberg et al), 435A

Pineal body
pineal tumors cause precocious pseudopuberty, not true precocious puberty (Fetell et al), 448A

Pituitary hormones
immunoglobulins of Lambert-Eaton myasthenic syndrome inhibit rat pituitary hormone release (Login et al), 610

Plasma
efficiency of plasma exchange in Guillain-Barré syndrome: role of replacement fluids (French Cooperative Group on Plasma Exchange in Guillain-Barré Syndrome), 753
Plasma cell dyscrasia
anti-GM_1 antibodies in motor neuron disease patients without plasma cell dyscrasia (Shy et al), 167A
Plasma exchange
efficiency of plasma exchange in Guillain-Barré syndrome: role of replacement fluids (French Cooperative Group on Plasma Exchange in Guillain-Barré Syndrome), 753
plasmapheresis and the Guillain-Barré syndrome (McKhann and Griffin), EDITORIAL, 762
Plasmalogens
rhizomelic chondrodysplasia punctata: a peroxisomal disorder with defective plasmalogen synthesis (Naidu et al), 439A
Plasmapheresis
efficiency of plasma exchange in Guillain-Barré syndrome: role of replacement fluids (French Cooperative Group on Plasma Exchange in Guillain-Barré Syndrome), 753
plasmapheresis and the Guillain-Barré syndrome (McKhann and Griffin), EDITORIAL, 762
Platelet activating factor
platelet activation in patients with cerebral ischemia (Fisher), 115A
Platelet aggregation
platelet-activating-factor–induced platelet aggregation is unaltered by cycloxygenase inhibition in acute human cerebral ischemia (Joseph et al), 136A
Poliomyelitis
peripheral origin of postpolio muscular atrophy: single-fiber and macro electromyographic studies (Lange and Lovelace), 127A
Poliovirus
variation in susceptibility to human poliovirus-induced paralysis in inbred mouse strains (Jubelt et al), 157A
Polyradiculoneuritis
efficiency of plasma exchange in Guillain-Barré syndrome: role of replacement fluids (French Cooperative Group on Plasma Exchange in Guillain-Barré Syndrome), 753
HIV seropositivity in Guillain-Barré syndrome (Berger et al), LETTER, 393
increased reactivity to HTLV-I in inflammatory nervous system diseases (Lolli et al), 67
plasmapheresis and the Guillain-Barré syndrome (McKhann and Griffin), EDITORIAL, 762
search for antibodies to galactocerebroside in the serum and cerebrospinal fluid in human demyelinating disorders (Rostami et al), 381
Pons
brain choline acetyltransferase reduction in dominantly inherited olivopontocerebellar atrophy (Kish et al), 272
movement disorders as sequelae of central pontine and extrapontine myelinolysis: report of three survivors (Maraganore et al), 146A
pathological crying: a pontine psuedobulbar syndrome (Tatemichi et al), 133A
pathological crying localization (Yarnell), 133A
unilateral asterixis due to ipsilateral lesions in the pons and medulla (Peterson and Peterson), 661
Prednisone
six-month trial of prednisone in Duchenne muscular dystrophy (Brooke et al), 120A
Presynaptic membrane
Lambert-Eaton myasthenic syndrome: I. Early morphological effects of IgG on the presynaptic membrane active zones (Fukuoka et al), 193
Lambert-Eaton myasthenic syndrome: II. Immunoelectron microscopy localization of IgG at the mouse motor end-plate (Fukuoka et al), 200
Primidone
primidone kinetics in neonates and young infants (Sapin et al), 412A
expression of prion protein in primary cultures of neonatal hamster brain (Borchelt et al), 155A
Prion protein
expression of the hamster prion protein gene using eukaryotic expression vectors (Scott et al), 156A
nucleotide sequence analysis of *Prn-p* genes from short and long scrapie prion incubation period mice (Westaway et al), 157A
properties of scrapie prion proteins into detergent-lipid-protein complexes (Gabizon et al), 157A
Progabide
progabide in Parkinson's disease (Luquin et al), LETTER, 284
Progressive supranuclear palsy
glucose hypometabolism in progressive supranuclear palsy is not limited to frontal cortex (Foster et al), 123A
loss of pedunculopontine neurons in progressive supranuclear palsy (Zweig et al), 18
tau antisera recognize neurofibrillary tangles in a range of neurodegenerative disorders (Joachim et al), 514
Prolactin
effect of prolactin on intracranial pressure in the neonatal beagle: relationship to risk of intracranial hemorrhage (Coulter and Gooch), 426A
Prostaglandins
mechanism of prostaglandin release from astrocytes: studies on the effect of protein kinase C–activating phorbol ester phorbol myristate acetate (Hartung et al), 141A
Protein S
protein S deficiency and intracranial vascular occlusion (Sacco et al), 115A
Proteolipids
myelin-associated glycoprotein in multiple sclerosis lesions: a quantitative and qualitative analysis (Möller et al), 469
Psoriasis
atlantoaxial subluxation in psoriatic arthropathy: clinical, magnetic resonance imaging, and radiographic features (Kaplan et al), 143A
Psychotropic drugs
mapping of metabolic responses of brain to mind-altering drugs (Porrino and Kennedy), 421A
Puberty, precocious
pineal tumors cause precocious pseudopuberty, not true precocious puberty (Fetell et al), 448A
Putamen
Huntington's disease: changes in tachykinin content in postmortem brains (Arai et al), 587
magnetic resonance imaging in multiple sclerosis: decreased signal in thalamus and putamen (Drayer et al), 546
transplantation in Parkinson's disease: two cases of adrenal medullary grafts to the putamen (Lindvall et al), 457
Pyridines
MPTP-induced changes in dopamine systems in the primate mesolimbic system (Deutch et al), 172A
Pyridoxine
new method to detect point mutations in the gene for glutamic acid decarboxylase in patients with pyridoxine-dependent seizures (Kaufman et al), 446A
pyridoxine-dependent epilepsy: new observations and clinical spectrum (Trevathan et al), 437A

Pyruvates
cerebrospinal fluid lactate and pyruvate in childhood neurological illnesses (Rust et al), 443A

Quadriplegia
differences in cerebral blood flow and glucose utilization in vegetative versus locked-in patients (Levy et al), 673

Radiotherapy
total lymphoid irradiation in multiple sclerosis: blood lymphocytes and clinical course (Cook et al), 634
Radiotherapy, adverse effects
intellectual sequelae of whole brain radiotheraphy for children with brain tumors (Packer et al), 408A
microcephaly and impaired cognitive function among survivors of acute lymphoblastic leukemia who received prophylactic cranial irradiation (Urion et al), 448A
Receptors, anticonvulsant
A3 adenosine binding sites: possible endogenous anticonvulsant receptor in brain? (Chin and DeLorenzo), 171A
Receptors, antigen, T-cell
benzodiazepine receptor function on human T-cell clones (Richert et al), 138A
Receptors, cholinergic
acetylcholine receptors in human thymic myoid cells in situ: an immunohistological study (Schluep et al), 212
myasthenia gravis with circulating antibodies to the human acetylcholine receptor: in vitro B cell functional studies (Oger and Kaufman), 140A
Receptors, dopamine
effect of corticotropin treatment on striatal dopamine D-2 receptors in developing rat brain (Chiriboga et al), 433A
proliferative response of blood cells of patients with myasthenia gravis to purified mammalian acetylcholine receptor (Sisley et al), 139A
role of the D-1 dopamine receptor in the pathogenesis of Huntington's disease (Braun et al), 170A
Receptors, muscarinic
principals of synaptic neurochemical development as demonstrated by an autoradiographic analysis of pre- and postsynaptic cholinergic binding (Singer et al), 433A
Receptors, serotonin
serotonin hypothesis of infantile spasms: regional studies of corticotropin effects in vitro and in vivo on serotonin receptors in the neonatal and adult rat central nervous system (Pranzatelli), 437A
Rett syndrome
characteristic electroencephalographic findings aid diagnosis of Rett's syndrome (Garofalo et al), 419A
elevated beta-endorphins in Rett's syndrome (Myer et al), 439A
Rett's syndrome: urine organic acid abnormalities (Chaves-Carballo), 442A
RNA
expression of specific fetal mouse brain mRNAs may be regulated by thyroid hormone (Stein), 447A
Rochester, MN
risk factors for ischemic stroke: a prospective study in Rochester, Minnesota (Davis et al), 319
trends in the incidence rates of stroke in Rochester, Minnesota, since 1935 (Homer et al), 245

Scalp
different scalp distribution of somatosensory evoked potentials to electrical and natural stimulation of the first and fifth digits (Cohen et al), 143A
Scanpaths. *See* Visual perception
Scopolamine
cholinergic-dependent cognitive deficits in Parkinson's disease (Dubois et al), 26
Scrapie
nucleotide sequence analysis of *Prn-p* genes from short and long scrapie prion incubation period mice (Westaway et al), 157A
properties of scrapie prion proteins into detergent-lipid-protein complexes (Gabizon et al), 157A
scrapie agent proteins do not accumulate in gray tremor mutant mice (Bendheim et al), 157A
unique structures in negatively stained preparations of tissues infected with the agents of scrapie and Creutzfeldt-Jakob disease (Narang et al), 156A
Seizures
adversive seizures in infancy (Duchowny et al), 438A
binding profiles of anticonvulsants in neonates with seizures (Painter et al), 413A
clinical evaluation of clorazepate (Guggenheim et al), 412A
defects in phagocytic function induced by the ketogenic diet in children with intractable seizures (Woody and Steele), 415A
diagnosing neonatal seizures (Duchowny and Resnick), LETTER, 97; reply (Younkin), LETTER, 97
early appearance of partial complex seizures in children with infantile autism (Payton and Minshew), 408A
effect of locus ceruleus stimulation on audiogenic seizure susceptibility in the immature genetically-epilepsy-prone rat (Thompson and Holmes), 418A
epilepsy following neonatal seizures (Clancy and Legido), 407A
functional anatomy of pentylenetetrazol and electroshock seizures in the rat brainstem (Miller et al), 615
increased cerebrospinal fluid levels of catecholamines following complex partial and generalized tonic-clonic seizures (Devinsky et al), 131A
in vivo ^{31}P and in vitro ^{1}H nuclear magnetic resonance study of hypoglycemia during neonatal seizure (Young et al), 622
kindled seizure model induced by pentylenetetrazol in rats (Ono and Walson), 416A
multiple brief nontemporal focal seizures in well children: a benign epileptic syndrome with apparent cure in some by a very short course of anticonvulsants (Camfield and Dooley), 414A
neurological outcome after electroencephalograph-proven neonatal seizures (Clancy and Legido), 429A
new method to detect point mutations in the gene for glutamic acid decarboxylase in patients with pyridoxine-dependent seizures (Kaufman et al), 446A
ontogenetic effects of kainic acid on behavioral seizures, electroencephalographic abnormalities, and seizure susceptibility (Holmes and Thompson), 417A
^{31}P and ^{1}H nuclear magnetic resonance study of the effect of diazepam on neonatal seizure (Young et al), 420A
phenobarbital serum concentration and response in neonatal seizures (Gilman et al), 417A
primidone kinetics in neonates and young infants (Sapin et al), 412A
psychogenic seizures in children and adolescents (Wyllie et al), 419A
safety of therapeutic doses of sympathomimetic medication in children with febrile seizures (McAbee and Kurfist), 411A
seizures after heart transplantation (Pavlakis et al), 438A
seizures during barbiturate withdrawal: relation to blood level (Theodore et al), 644
seizures induced by orgasm (Berthier et al), LETTER, 394

Seizures *(continued)*
strategy for surgical selection of patients with partial seizures: the role of positron emission tomography (Theodore et al), 133A
subdural electrode recording in the preoperative evaluation of partial seizures in children (Resnick et al), 415A
treatment of neonatal seizures with lorazepam (Roddy et al), 412A
use of methylphenidate in children with seizures and attention deficit disorder (Crumrine et al), 441A
Self-mutilation
naltrexone decreases self-injurious behavior (Herman et al), 550
Senile plaques
nature and origin of senile plaques in Alzheimer's disease, congophilic angiopathy, and normal old age (Narang), 122A
sprouting and reactive astrocytes in senile plaque formation (Geddes et al), 131A
Serotonin
aminergic systems in Alzheimer's disease and Parkinson's disease (D'Amato et al), 229
elevated serotonin and reduced dopamine in subregionally divided Huntington's disease striatum (Kish et al), 386
Shy-Drager syndrome
somatic and autonomic function in progressive autonomic failure and multiple system atrophy (Cohen et al), 692
Sinus thrombosis
diagnosis of dural venous sinus thrombosis by magnetic resonance imaging (Moots et al), 431A
transverse sinus thrombosis in newborns: clinical and magnetic resonance imaging findings (Baram et al), 425A
Skeletal muscle
antibodies against extracted skeletal muscle antigens in myasthenia gravis (Ashizawa et al), 140A
biochemical fiber type differentiation in developing skeletal muscle (Turk and Wargowski), 440A
positron emission tomography using pyruvate-1-^{11}C of mitochondrial encephalomyopathies (Sakuragawa et al), 442A
Sleep disorders
oculomasticatory myorhythmia (Grotta et al), LETTER, 395
Somatostatin
cerebrospinal fluid monoamine metabolites and somatostatin in dominantly inherited Alzheimer's disease (Polinsky et al), 121A
corticotropin-releasing factor and somatostatin in Alzheimer's disease: comparative changes in postmortem cerebral cortex (Mazurek et al), 122A
somatostatin and cognitive dysfunction in Alzheimer's disease (Swihart et al), 122A
Sonography
inflammatory myopathies of childhood: diagnosis and follow-up by computerized realtime sonography (Fischer et al), 451A
Spasms, infantile
infantile spasms in multiple twinships (Kerr and Roach), 130A
Spinal cord diseases
cervical spine disorders in an institutionalized population with Down's syndrome (Clancy et al), 452A
magnetic resonance imaging in isolated noncompressive spinal cord syndromes (Miller et al), 714
Spinal cord injuries
collagen-omentum repair after experimental spinal cord transection (de la Torre and Goldsmith), 141A
metabolic changes after experimental spinal cord injury: assessment by magnetic resonance spectroscopy (Faden et al), 118A
motor neuron disease after cervical spinal cord trauma (Munsat et al), 127A
Spinal cord, surgery
surgical management of tethered cords in children with lipomyelomeningocele produces improved neurological outcome (Miller and Nagib), 435A
Spinal neoplasms
spinal epidural metastases (Nardone), LETTER, 556; reply (Rodichok), LETTER, 556
Spinal nerve roots
simple, low-tech clinical test and treatment for cervical root compression (Engel), 165A
Status epilepticus
etiology and mortality of status epilepticus in children and infants: an update (Phillips et al), 416A
kinetics of phenytoin uptake during status epilepticus (Simon et al), 132A
lorazepam versus diazepam in status epilepticus in children (Giang and McBride), 415A
mortality and seizure duration in status epilepticus (DeLorenzo et al), 132A
successful use of rectal diazepam at home to prevent status epilepticus in selected children with convulsive disorders (Camfield et al), 417A
Sterilization
autoclaving standards for Creutzfeldt-Jakob disease agent (Taylor), LETTER, 557
Steroids
X-linked ichthyosis due to steroid sulfatase deficiency associated with hypogonadism and anosmia (Andria et al), LETTER, 98; reply (Shapiro and Yen), LETTER, 99
Stroke
comparative evaluation of single photon emission computed tomography, xenon clearance, and computed tomography in acute stroke (Broich et al), 160A
"denervation" in stroke patients with corticospinal lesions (Uncini et al), 125A
does carotid endarterectomy decrease stroke and death in patients with transient ischemic attacks? (Committee on Health Care Issues, American Neurological Association), HEALTH CARE ISSUES, 72
kynurenate inhibition of cell excitation decreases stroke size and deficits (Germano et al), 730
new model of embolic stroke in the rat from a photochemical nonocclusive carotid lesion (Futrell et al), 158A
prosodic deficits in children with left and right hemisphere lesions (Friedland et al), 408A
risk factors for ischemic stroke: a prospective study in Rochester, Minnesota (Davis et al), 319
silent or unreported stroke detected on computed tomographic scan: the Stroke Data Bank experience (Chodosh et al), 135A
studies of an animal model for the recovery of function after stroke (Goldstein et al), 159A
Stroke, familial and genetic
mendelian etiologies of stroke (Natowicz and Kelley), NEUROLOGICAL PROGRESS, 175
Stroke, mortality
trends in the incidence rates of stroke in Rochester, Minnesota, since 1935 (Homer et al), 245
Sturge-Weber syndrome
comparative magnetic resonance and computed tomographic brain imaging in Sturge-Weber syndrome (Chamberlain and Press), 431A
Stuttering
site of penetrating brain lesions causing chronic acquired stuttering (Ludlow et al), 60

Subacute sclerosing panencephalitis
quantitation of antibodies to matrix protein of measles virus in the serum and cerebrospinal fluid of patients with subacute sclerosing panencephalitis (Dhib-Jalbut et al), 154A
soluble IL-2 receptors in acute and subacute encephalitis (Boutin et al), 658
Subarachnoid hemorrhage
factors associated with hydrocephalus in subarachnoid hemorrhage (Graff-Radford et al), 137A
mycotic aneurysm, subarachnoid hemorrhage, and indications for cerebral angiography in infectious endocarditis (Salgado et al), 159A
Subclavian steal syndrome
reversed basilar artery flow detected by transcranial Doppler ultrasound in the subclavian steal syndrome (Tatemichi et al), 136A
Substance P
Huntington's disease: changes in tachykinin content in postmortem brains (Arai et al), 587
Substantia innominata
basal forebrain–lesioned monkeys are severely impaired in tasks of association and recognition memory (Irle and Markowitsch), 735
Substantia nigra
Huntington's disease: changes in tachykinin content in postmortem brains (Arai et al), 587
substantia nigra lesion protects against ischemic striatal injury: morphological evidence (Globus et al), 116A
Sulfatases
X-linked ichthyosis due to steroid sulfatase deficiency associated with hypogonadism and anosmia (Andria et al), LETTER, 98; reply (Shapiro and Yen), LETTER, 99
Sweat glands
orderly recruitment of sweat gland secretion (Kennedy et al), 150A
Sympathomimetics
safety of therapeutic doses of sympathomimetic medication in children with febrile seizures (McAbee and Kurfist), 411A
Syncope
syncope in childhood: a controlled study of the familial tendency to faint (Camfield and Camfield), 419A
Syphilis
cerebrovascular disease and systemic lupus erythematosus (Kujala), LETTER, 396; cerebrovascular disease and systemic lupus erythematosus (Asherson and Gledhill), LETTER, 397; reply (Shiozawa et al), LETTER, 397

Tau proteins
axonal disruption and aberrant localization of tau protein characterize the neuropil pathology of Alzheimer's disease (Kowall and Kosik), 639
in vitro self-assembly of neurofilament and tau proteins (Troncoso et al), 124A
tau antisera recognize neurofibrillary tangles in a range of neurodegenerative disorders (Joachim et al), 514
Temporal arteritis
neuroophthalmological spectrum of temporal arteritis (Mehler and Rabinowich), 147A
temporal arteritis: clinical and epidemiological features from a community-based study, 1950 to 1985 (Machado et al), 148A
Teratoma
atypical teratoid tumor of infancy: definition of an entity (Lefkowitz et al), 448A
Tetrahydroaminoacridine
anatomy of cholinesterase inhibition in Alzheimer's disease: effect of physostigmine and tetrahydroaminoacridine on plaques and tangles (Mesulam et al), 683
Tetrodotoxin
effect of tetrodotoxin-induced paralysis on expression of muscle-"specific" isozymes and acetylcholinesterase in innervated cultured human muscle fibers (Martinuzzi et al), 163A
Thalamus
inhibition of cortical and thalamic glucose metabolism (Sharp et al), 132A
magnetic resonance imaging in multiple sclerosis: decreased signal in thalamus and putamen (Drayer et al), 546
syndromes of the paramedian thalamopeduncular arteries: clinical and magnetic resonance imaging correlations in infarctions of the upper midbrain and thalamus (Tatemichi et al), 159A
venous infarction: a major cause of intraventricular hemorrhage in the term newborn (Roland et al), 436A
Thallium
thallium intoxication: clinical experience with 45 patients (Rangel-Guerra et al), 144A
Thrombocytosis
thrombocytosis complicating giant cell arteritis (Vincent), 142A
Thromboembolism
cerebrovascular disease and systemic lupus erythematosus (Kujala), LETTER, 396; cerebrovascular disease and systemic lupus erythematosus (Asherson and Gledhill), LETTER, 397; reply (Shiozawa et al), LETTER, 397
Thymus gland
acetylcholine receptors in human thymic myoid cells in situ: an immunohistological study (Schluep et al), 212
transcervical thymectomy for myasthenia gravis (Humphrey et al), 166A
Thyroid hormones
expression of specific fetal mouse brain mRNAs may be regulated by thyroid hormone (Stein), 447A
Thyroiditis, lymphomatous
Hashimoto's encephalopathy: a new neuroimmunological syndrome (Henderson et al), 140A
Thyrotropin-releasing hormone
current status of thyrotropin-releasing hormone therapy in amyotrophic lateral sclerosis (Committee on Health Care Issues, American Neurological Association), HEALTH CARE ISSUES, 541
Tomography
comparative evaluation of single photon emission computed tomography, xenon clearance, and computed tomography in acute stroke (Broich et al), 160A
improved methods for mapping local cerebral blood flow by 27% to 30% xenon-enhanced computed tomography (Meyer et al), 158A
xenon computed tomography cerebral blood flow determinations in clinically brain dead children (Ashwal et al), 451A
Tomography, emission computed
asymptomatic unilateral MPTP lesions visualized in vivo by fluorodopa positron emission tomographic scans in cynomolgus monkeys (Guttman et al), 172A
borderzone ischemia (Leblanc et al), 707
combined positron emission tomography and DNA studies may identify recombination between the linked marker and the gene in asymptomatic individuals at risk for Huntington's disease (Martin et al), 145A
differences in cerebral blood flow and glucose utilization in vegetative versus locked-in patients (Levy et al), 673

Tomography, emission computed *(continued)*
lowered cerebral glucose utilization in amyotrophic lateral sclerosis (Dalakas et al), 580
metabolic pathology of the AIDS dementia complex (Rottenberg et al), 700
positron emission tomography studies of cerebral glucose metabolism in chronic partial epilepsy (Abou-Khalil et al), 480
positron emission tomography study of human brain functional development (Chugani et al), 487
strategy for surgical selection of patients with partial seizures: the role of positron emission tomography (Theodore et al), 133A
study of Broca's aphasia by ^{18}F-fluorodeoxyglucose positron emission tomography (Metter et al), 134A
Tomography, x-ray computed
comparative magnetic resonance and computed tomographic brain imaging in Sturge-Weber syndrome (Chamberlain and Press), 431A
comparison of x-ray computed tomography and magnetic resonance imaging of brain tumor using an adult canine glioma model (Whelan et al), 407A
computed tomographic and magnetic imaging in twins with neuroaxonal dystrophy (Barlow et al), 444A
computed tomographic scans, Glasgow Coma Scale, and outcome in childhood head trauma (Scheller et al), 432A
diagnostic and prognostic significance of low-attenuation lesions in the head computed tomography scan of patients with tuberous sclerosis (Gomez et al), 419A
serial quantitative computed tomography analysis of brain morphometry in adult Down's syndrome at different ages (Schapiro et al), 432A
silent or unreported stroke detected on computed tomographic scan: the Stroke Data Bank experience (Chodosh et al), 135A
Tourette's syndrome. *See* Gilles de la Tourette's disease
Transthyretin
intraocular transthyretin synthesis explains ocular involvement in familial amyloidotic polyneuropathy (Martone et al), 149A
mechanism of increased cerebrospinal fluid transthyretin in the neonate is different from that in diseases in which there is increased blood–cerebrospinal fluid barrier permeability (Larsen and DeLallo), 428A
Tremor
glucose hypermetabolism of the inferior olive in patients with essential tremor (Dubinsky and Hallett), 118A
unilateral asterixis due to ipsilateral lesions in the pons and medulla (Peterson and Peterson), 661
Tretinoin
combination of retinoic acid and interferons in inhibiting proliferation of cultured human medulloblastoma cell lines (Maria et al), 449A
experimental allergic encephalomyelitis suppression with retinoic acid (Massacesi et al), 153A
Trigeminal ganglia
neuropathological and immunohistochemical changes in the trigeminal ganglia in Creutzfeldt-Jakob disease (Shankar et al), 120A
Tuberous sclerosis
diagnostic and prognostic significance of low-attenuation lesions in the head computed tomography scan of patients with tuberous sclerosis (Gomez et al), 419A
DNA linkage studies in tuberous sclerosis (Kandt et al), 422A
ultraviolet light in evaluation for tuberous sclerosis (Kandt), 420A
Twins
infantile spasms in multiple twinships (Kerr and Roach), 130A

Ultrasonics
cerebral vascular reactivity in migraineurs as measured by transcranial Doppler ultrasound (Thomas and Harpold), 148A
Ultraviolet rays
ultraviolet light in evaluation for tuberous sclerosis (Kandt), 420A

Valproate
acute and chronic administration of therapeutic doses of valproate reduces brain aspartate levels in developing mice: possible neurophysiological and clinical significance (Thurston and Hauhart), 438A
effect of carbamazepine on valproic acid and its unsaturated metabolites (Farrell et al), 418A
Valproate, adverse effects
valproate-induced gastritis (Marks et al), 414A
Varicella-zoster virus
detection of varicella-zoster virus nucleic acid in neurons of normal human thoracic ganglia (Gilden et al), 377
Vasculitis
cerebral granulomatous angiitis causing multiple ischemic cerebrovascular accidents in a child with acquired immunodeficiency syndrome (Frank et al), 452A
peripheral nerve vasculitis: immune characterization of vascular lesions (Riethman et al), 119A
Vincristine
continuous infusion vincristine and adriamycin in the treatment of recurrent childhood brain tumors (Walker et al), 448A
Viruses
molecular pathogenesis of neurotropic viral infections (Gonzalez-Scarano and Tyler), NEUROLOGICAL PROGRESS, 565
Visual pathways
effect of levodopa treatment on contrast sensitivity in Parkinson's disease (Bulens et al), 365
visual evoked potentials in compression of the anterior visual pathways (Staudacher and Reuther), 147A
Visual perception
role of scanpaths in facial recognition and learning (Rizzo et al), 41
Vitamin D
parathyroid and vitamin D metabolism in amyotrophic lateral sclerosis (Glasberg et al), 127A
Vitamin E deficiency
adult-onset spinocerebellar syndrome with idiopathic vitamin E deficiency (Yokota et al), 84

Waldenström's macroglobulinemia. *See* Macroglobulinemia
Werdnig-Hoffman disease
ultrastructural evidence of chronic denervation and reinnervation in Werdnig-Hoffman disease (Zalneraitis et al), 450A
Wernicke's encephalopathy
mamillary body atrophy in Wernicke's encephalopathy: antemortem identification using magnetic resonance imaging (Charness and DeLaPaz), 595
Whipple's disease. *See* Lipodystrophy, intestinal

Xanthomatosis
psychiatric manifestations of cerebrotendinous xanthomatosis (Townsend et al), 134A
